## 1 Introduction

The cooperation level of the chambers, economic development organizations, agencies concerned in regional economy development at the Slovenian-Hungarian border area is not satisfactory.

There are a lot of similarities in the economy of the two countries, and they encounter with the same obstacles and difficulties such as long-term unemployment, employing difficulties of persons with low or no education, lack of professionals, lack of business cooperation in supply and trade, unsatisfactory degree of innovation, etc.

In this project a challenge of improving the institutional cooperation in 4 regions (Podravje, Pomurje, Zala and Vas) is tackled. In order to improve business cooperation among these regions the project will empower the networking among the business support institutions on both sides of the border and launch the web platform.

In the Slovenian workshop of business support organisations in Podravje and Pomurje the existing and working databases and knowledge webpages were scanned through and this is the report on regional and national levels what is already available and supports the business cooperation.

Similar workshop was also performed in Hungary with Hungarian business support organisations. The conclusions from both national workshops will be used to form the cross-border network of support organisations and to develop the networking platform with a knowledge base.

## 2 Methodological approach

The methodology for preparing the E-CONOMY web platform includes the following elements:

- Personal interviews with companies and business support institutions on both sides of the border;
- Expert workshop with business support institutions in Slovenia, regions: Podravje and Pomurje;
- Expert workshop with business support institutions in Hungary; regions: Zala and Vas;
- Joint coordination workshop with partners, institutions and companies;
- Preparation of a methodological manual that serves as a guide for the preparation of the platform.

The personal interviews with companies and business support institutions were performed by partners in Slovenia and Hungary. Over 50 companies and institutions were interviewed, approximately half of them being institutions and the other half the companies.

Workshops have been carried out in Slovenia on the 29<sup>th</sup> March, 2018 and in Hungary on the 2<sup>nd</sup> May, 2018. Based on the experience gained at these two specific expert workshops, a two-day joint coordination workshop in Hungary on the 24<sup>th</sup> and 25<sup>th</sup> May, 2018 was held.

In this way the existing business support capacities and the expectations of institution and companies from E-CONOMY web platform were analysed and evaluated.

The result of these implemented activities is this guide for graphic, content and structural elements and the functioning of the web and mobile application platform that will be developed in this project.

### 3 Survey on expectations for E-CONOMY platform

Personal interviews with companies and business support institutions on both sides of the border were made by partners. The results from the questionnaires are summarised in Table 1.

**Table 1: The results of personal interviews regarding expectations for E-CONOMY platform.**

\*Grades: 0 - not necessary; 1 - less important; 2 – important; 3 - very important

Over 40 of respondents states that the most important and useful information on the platform would be the information about establishing rules of companies and regulations regarding tax and employment (Figure 1). Information about the country got the lowest grades.

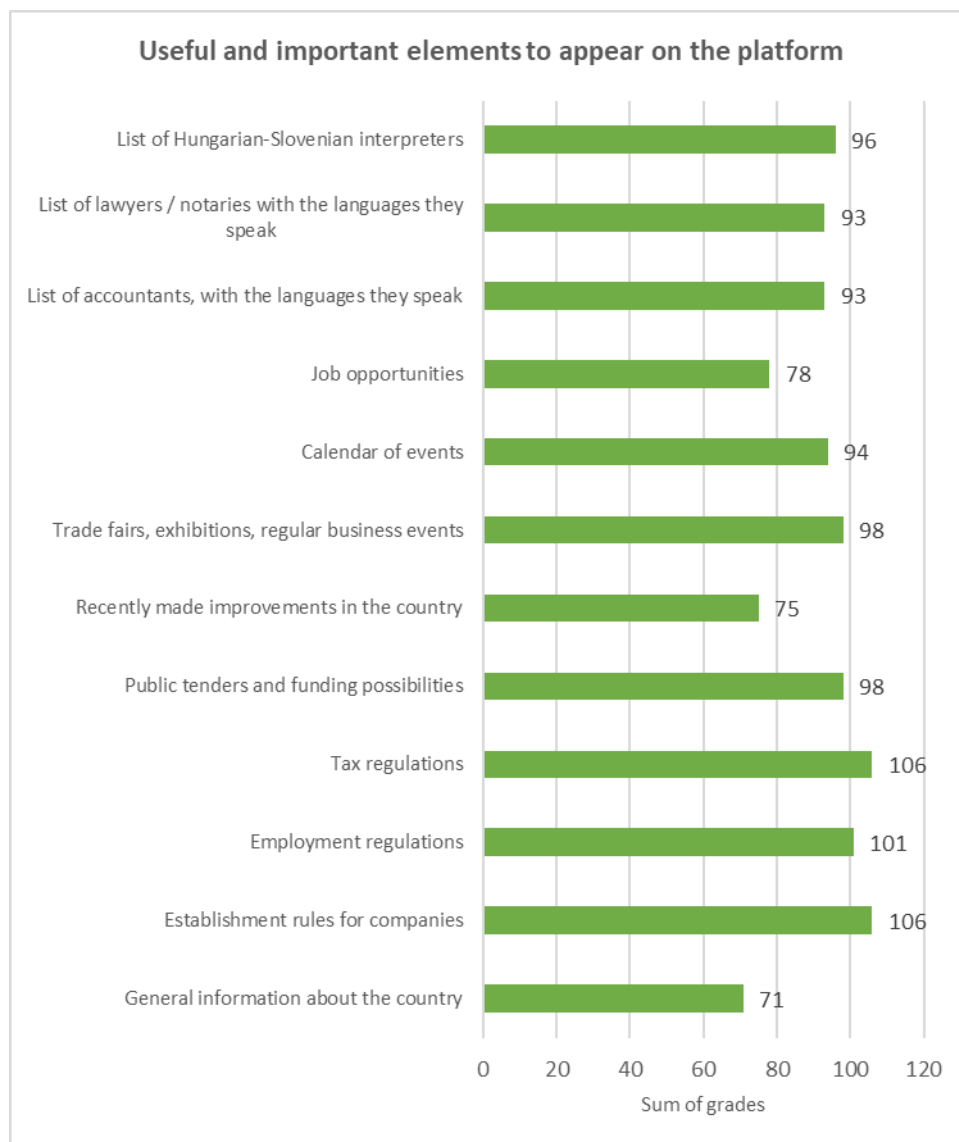

Figure 1: Answers to the question: “Which of the following elements are, in your opinion, useful and important to appear on the online platform?”.

Services or activities provided by the institution or organization to companies and information on contact persons are the most important to institutions (Figure 2).

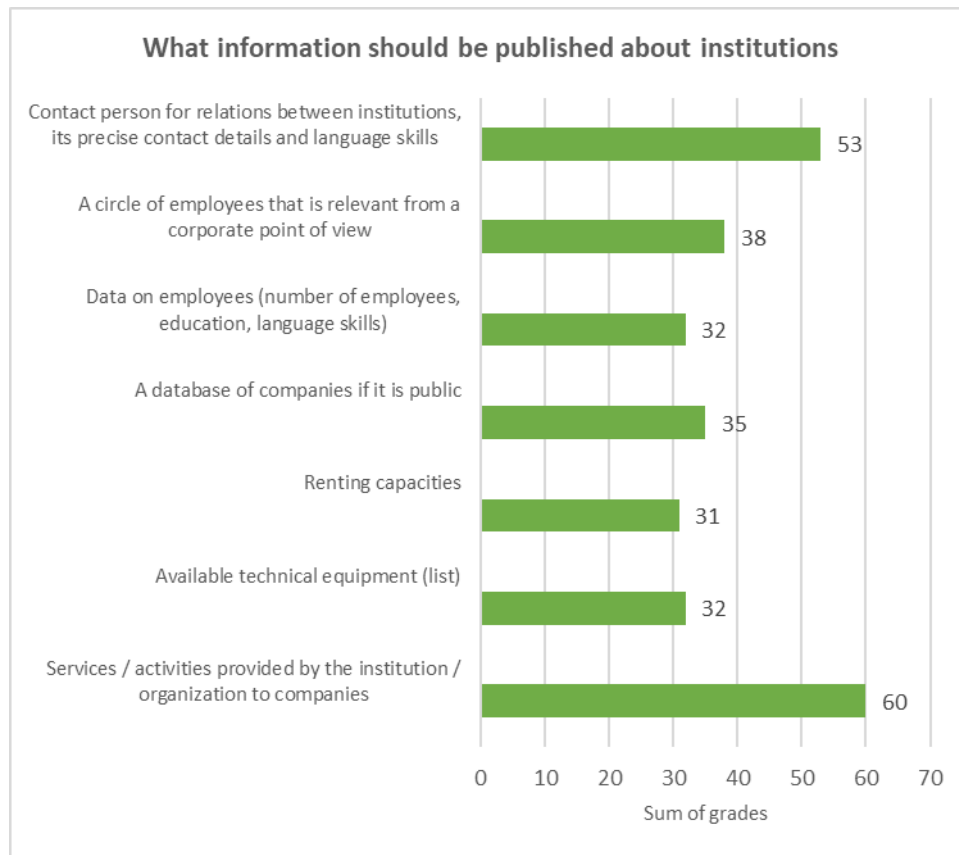

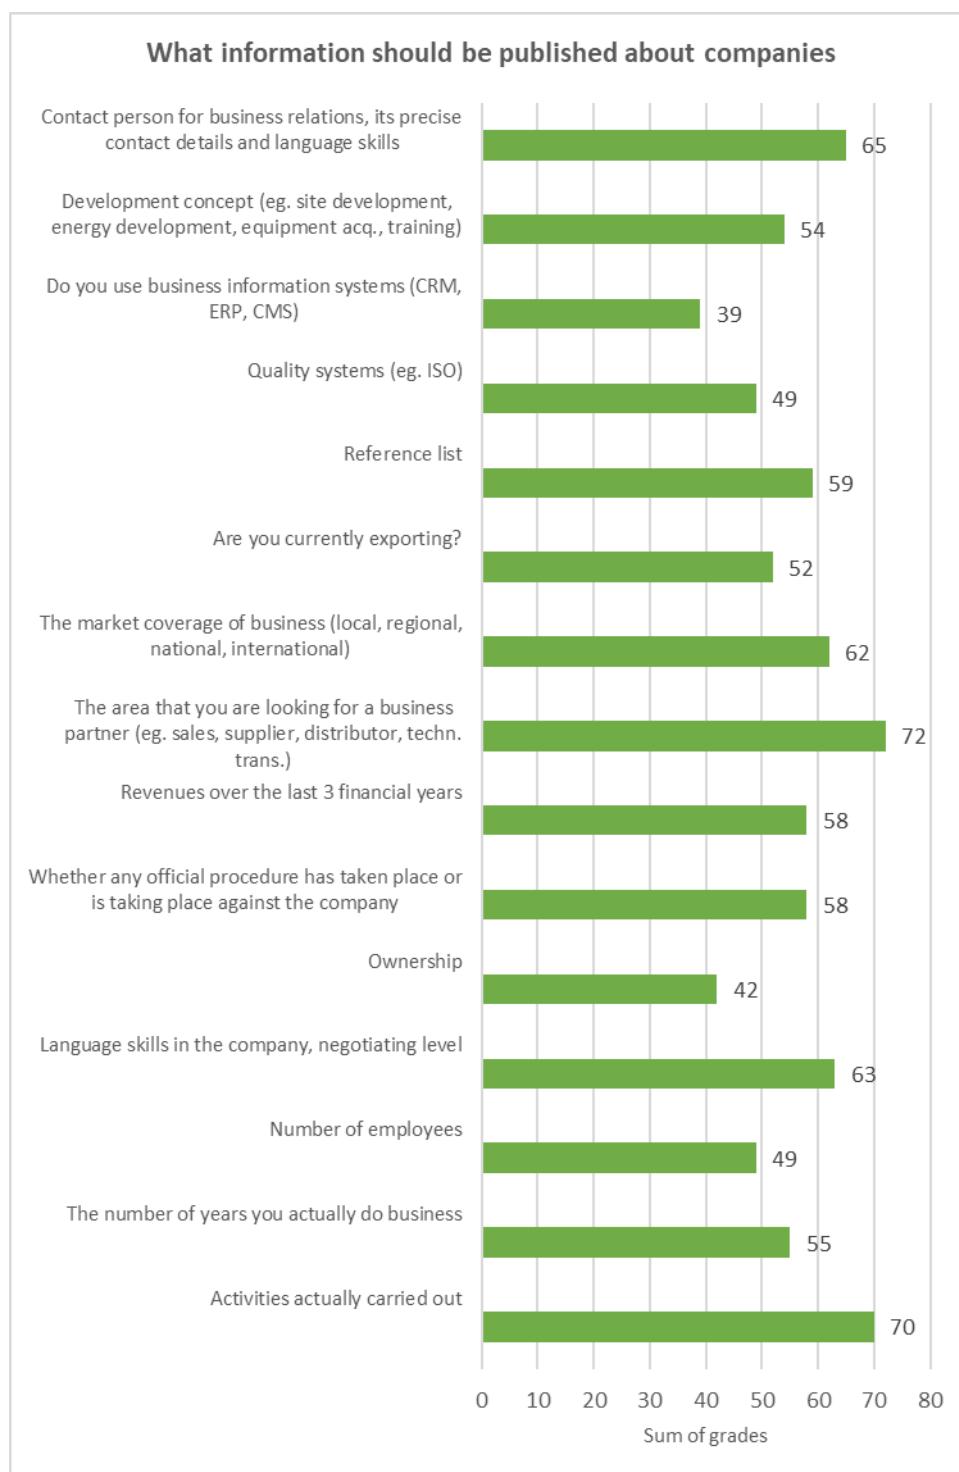

Figure 2: Answers to the questions for institutions - What information do you think should be published about institutions like yours on the platform, next to basic information?

Companies consider the area that a company is looking for a business partner (eg. selling your own product / service, looking for a supplier, looking for a distributor, technology transfer, etc.) as most important (Figure 3).

**Figure 3: Answers to the questions for companies - What information, besides basic information, do you want to know about companies for establishing business cooperation?**

## 4 Workshop of business support organisations in Slovenia

The workshop of business support organisations in Slovenia was held on March 29<sup>th</sup>, 2018 in Maribor.

The following persons participated:

1. Mag. nataša Lorber, Pomurska gospodarska zbornica

3. Vesna Herženjak, Štajerska gospodarska zbornica
4. Dijana Bestijanić, Mariborska razvojna agencija
5. Jasna Mak, Mariborska razvojna agencija
6. Danica Košir, RIC Slovenska Bistrica
7. Reiter Lidija, Agencija Trend d.o.o.
8. Mirjana Ivanuša, Mirjana Ivanuša s.p.
9. Bojan Baša, LTB d.o.o.
10. Milan Svetec, PORA Gornja Radgona
11. Brigita Drevenšek, ZRS Bistra Ptuj
12. Jadranka Krajnc, ZRS Bistra Ptuj
13. Dr. Lidija Tušek, ZRS Bistra Ptuj
14. Rosvita Bedrač, ZRS Bistra Ptuj
15. Aleš Skalič, Razvojni center Murska Sobota
16. Prof. dr. Lidija Fras Zemljič, Univerza v Mariboru
17. Anton Habjanič, Univerza v Mariboru
18. Jure Verhovnik, Inštitut za razvoj podjetništva

Figure 4: Workshop with business support organisations in Podravje and Pomurje.

## 4.1 Review on websites and public databases

### 4.1.1 Important national websites

#### 4.1.1.1 *SPIRIT Slovenia*

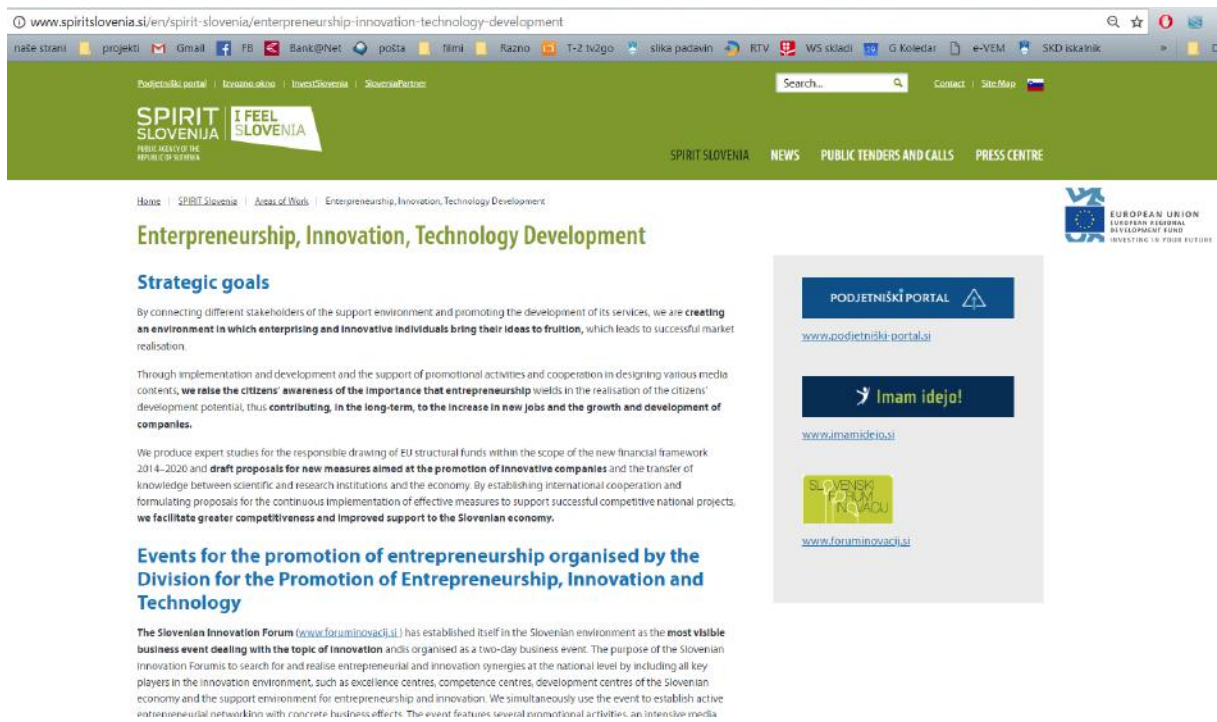

The landing page of agency Spirit Slovenia directs to subpage Areas of Work with the following information:

At the start of 2013, the Slovenian economic environment became richer with the introduction of a new institution that represents an important step towards the achievement of greater efficiency and competitiveness of the Slovenian economy. The Public Agency for Entrepreneurship, Internationalization, Foreign Investments and Technology, or SPIRIT Slovenia for short, began executing its functions at the start of this year.

An agency was created that will provide support to the Slovenian economy in a coordinated, transparent and comprehensive manner in the most important areas of the Slovenian economy:

- Entrepreneurship, Innovation, Technology Development
- Internationalisation and Foreign Direct Investment

The information is available in two languages: Slovene and English.

## Entrepreneurship, Innovation, Technology Development

### Strategic goals

By connecting different stakeholders of the support environment and promoting the development of its services, we are **creating an environment in which enterprising and innovative individuals bring their ideas to fruition**, which leads to successful market realisation.

Through implementation and development and the support of promotional activities and cooperation in designing various media contents, **we raise the citizens' awareness of the importance that entrepreneurship yields** in the realisation of the citizens' development potential, thus **contributing, in the long-term, to the increase in new jobs and the growth and development of companies**.

We produce expert studies for the responsible drawing of EU structural funds within the scope of the new financial framework 2014–2020 and **draft proposals for new measures aimed at the promotion of innovative companies** and the transfer of knowledge between scientific and research institutions and the economy. By establishing international cooperation and formulating proposals for the continuous implementation of effective measures to support successful competitive national projects, **we facilitate greater competitiveness and improved support to the Slovenian economy**.

### Events for the promotion of entrepreneurship organised by the Division for the Promotion of Entrepreneurship, Innovation and Technology

The **Slovenian Innovation Forum** ([www.foruminovaci.si](http://www.foruminovaci.si)) has established itself in the Slovenian environment as the **most visible business event dealing with the topic of innovation** and is organised as a two-day business event. The purpose of the Slovenian Innovation Forum is to search for and realise entrepreneurial and innovation synergies at the national level by including all key players in the innovation environment, such as excellence centres, competence centres, development centres of the Slovenian economy and the support environment for entrepreneurship and innovation. We simultaneously use the event to establish active entrepreneurial networking with concrete business effects. The event features several promotional activities, an intensive media

#### 4.1.1.2 Podjetniški portal

Podjetniški portal gives information about:

- News,
- Events,
- Tenders and calls.

It's available only in Slovene.

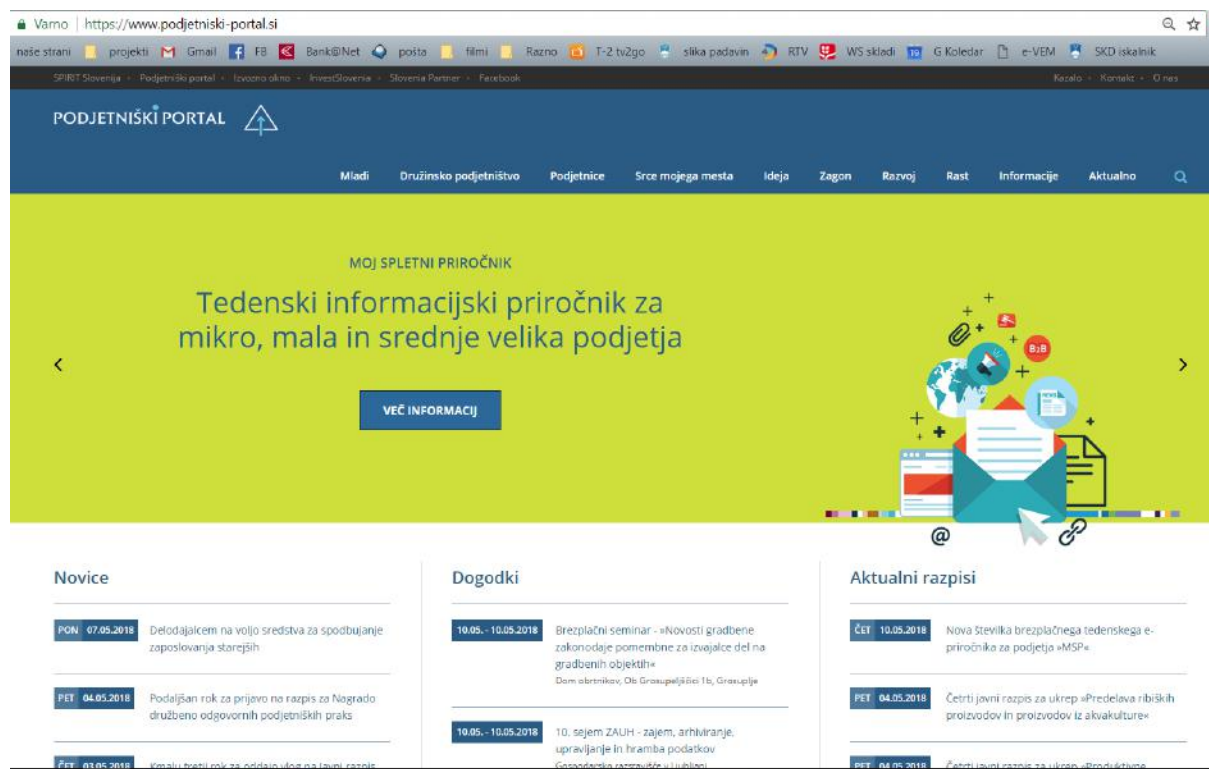

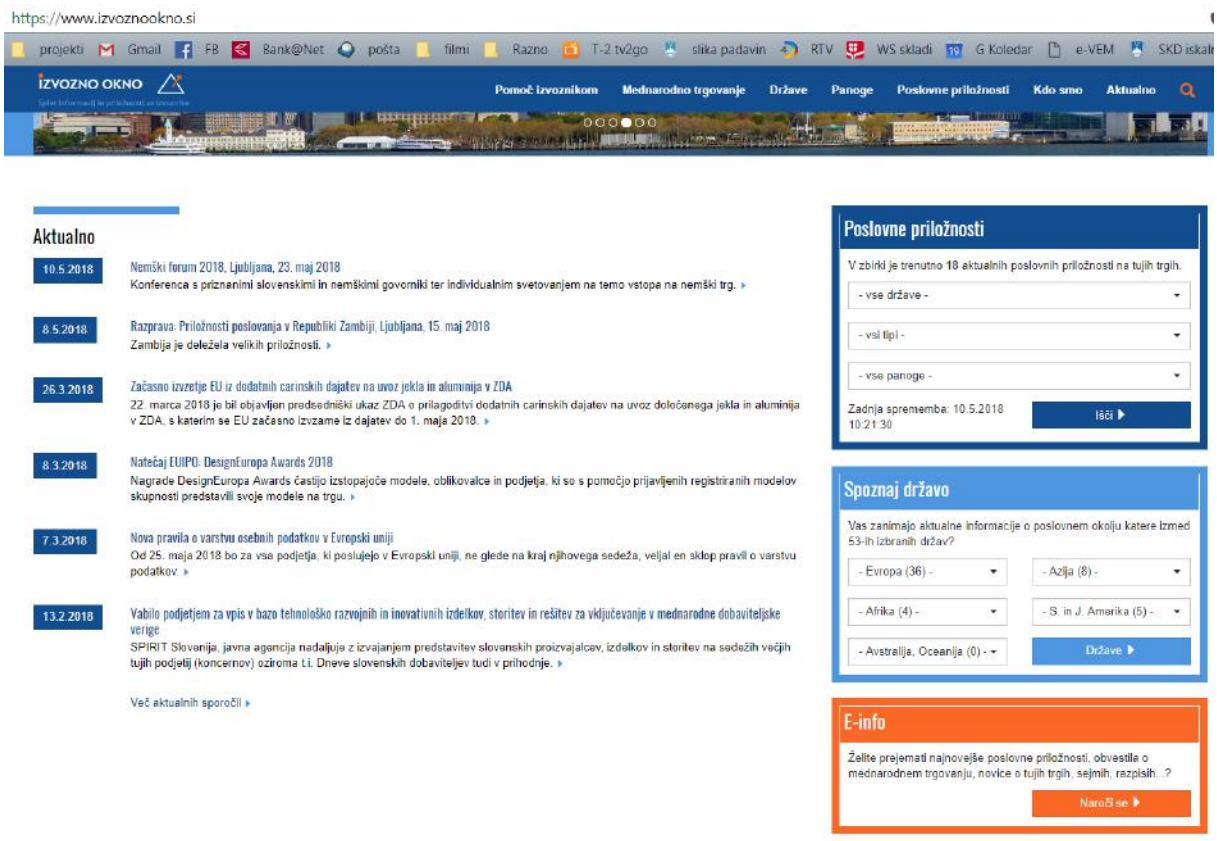

Figure 6: Podjetniški portal is available only in Slovene.

#### 4.1.1.3 Izvoznookno.si

Slovene exporters can find useful information about business environment in foreign countries on the pages of izvoznookno.si. 53 countries including Hungary are presented. Search for business opportunities in selected counties according to the type of business is possible.

## GOOD PRACTICE

The searchfields »Poslovne priložnosti« (i.e. Business opportunities) and »Spoznaj državo« (i.e. Get know the country) on page [izvoznookno.si](http://izvoznookno.si) (Figure 7) are the elements that should be included to the web platform of project E-CONOMY. The pages are only in Slovene therefore adequate translation is needed.

## Borza mednarodnega poslovnega sodelovanja

Preko Enterprise Europe Network lahko podjetja sklenejo poslovno sodelovanje. Podjetja se lahko naročijo na ponudbe in povpraševanje tujih podjetij, lahko pa tudi sama posredujejo svojo ponudbo za poslovno sodelovanje v tujini.

Enterprise Europe Network je v podporo majhnim in srednje velikim podjetjem ustanovil Generalni direktorat za podjetništvo in industrijo Evropske komisije. Storitve mreže obsegajo naslednja področja:

- mednarodno poslovno sodelovanje,
- inovacije, prenos znanja in tehnologij,
- sodelovanje v programih EU.

S 600 centri v več kot 50 evropskih državah in približno 4.000 izkušenimi strokovnjaki, povezanimi v enotno mrežo, je Enterprise Europe Network največja mreža v Evropski uniji na področju nudenja strokovnega znanja in storitev podjetjem, univerzam, raziskovalnim organizacijam, tehnološkim centrom in drugim poslovnim in inovacijskim institucijam.

V Sloveniji je Enterprise Europe Network prisoten v konzorciju sedmih partnerjev, eden izmed njih je SPiRIT Slovenija.

Za podjetja mreža organizira poslovna srečanja v Sloveniji in v tujini, pomaga podjetjem pri udeležbi na mednarodnih sejmih in tudi drugih poslovnih dogodkih, promovira povezovanje podjetij v različne medpodjetniške povezave, grozde in podjetniške mreže ter nudi individualne storitve na področju poslovnega sodelovanja.

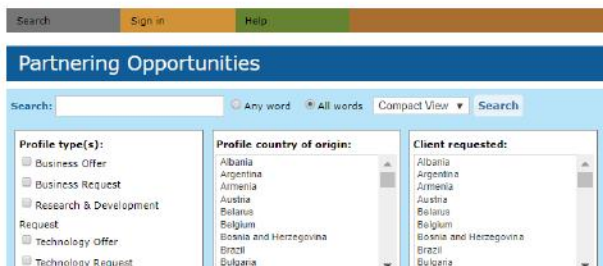

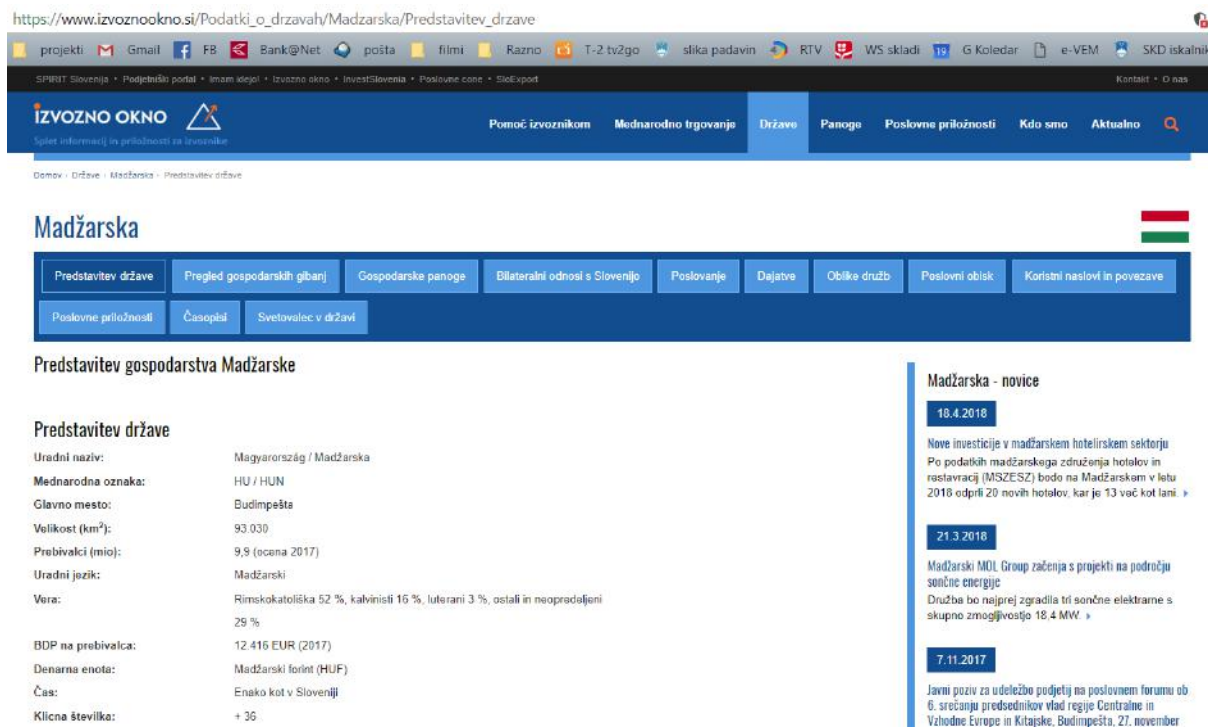

Figure 7: Pages izvoznookno.si for Slovene exporters.

The screenshot shows the website 'IZVOZNO OKNO' with a navigation menu and a main content area. The main content area is titled 'Madžarska' and includes a sub-section 'Predstavitev države' (Country Introduction). This section provides detailed information about Hungary, including its official name, international code, capital, population, and economic data. A sidebar on the right contains 'Madžarska - novice' (Hungary - news) with several news items dated 18.4.2018, 21.3.2018, and 7.11.2017.

Uradni naziv:	Magyarország / Madžarska
Mednarodna oznaka:	HU / HUN
Glavno mesto:	Budimpešta
Velikost (km <sup>2</sup> ):	93.030

## BUSSINES ENVIRONMENT

Pro-business climate in Slovenia

Slovenia's extensive economic reforms started in 2000 led to gradual **regulatory changes in the FDI area**. The approval mechanisms became streamlined and clear to investors improving Slovenia's investment climate and increasing foreign investors' confidence.

A growing recognition of the importance of FDI as a source of fixed capital formation to economic growth and performance was translated into the government commitment to actively encourage inward investment by **streamlining the investment promotion agencies** and **offering special investment incentives**. Under the cost-sharing schemes designed to attract serious investors, funding is available to investors whose projects will build on Slovenia's key selling points: well-developed infrastructure and supporting industries, and clusters of specialised suppliers.

The overall supply chain costs are low in Slovenia thanks to its strategic geographical position at the heart of the market with 500 million customers without any customs and duties, equally convenient to serve east and south-east Europe, as well as Asia.

The **InvestSlovenia Team** of the Slovenian Public Agency for Entrepreneurship, Internationalization, Foreign Investments and Technology - SPIRIT Slovenija - maintains a **database of sectors and companies** to target, leasehold and freehold **locations** to develop or redevelop, and **regulations**. Here investors will find answers to most of the basic questions they may have when investigating Slovenia as a possible investment site and InvestSlovenia people are able to respond to an **investor inquiry** with in-depth, customised information.

**SLOEXPORT**

Podatkovna baza slovenskih izvoznikov  
Database of Slovenian Exporters

Detailed presentation of Slovenian exporters, suppliers and potential business partners.

**FOCUS ON WINNING PERFORMANCE**

Slovenia's long industrial tradition and good education, extensive training and personal qualities of its people explain why so many industries have such a **large footprint in international markets**. A recent drop in less technology intensive and less competitive manufacturing industries is offset by a significant increase in the share of **industries of higher technology intensity**.

Slovenia's export competitiveness attribute to the restructuring of the Slovenian economy towards high-tech products and the markets. Slovenia exports a relatively large number of intermediate products and the share of domestic value added in exports has to rise particularly in the high- and medium-high technology industries: manufacture of vehicles and vessels, the manufacture of electrical and optical equipment, and the manufacture of machinery and equipment.

Knowledge-intensive services lead to manufacturing or technological innovations and sharpen the competitive edge of Slovenia's manufacturing industries at home and abroad. The flagship industries include: pharmaceuticals and chemicals, electronics and electrical engineering, machine building, wood processing, food processing, textile, life science and hospitality and entertainment.

We present some of the most competitive industries with the leading companies.

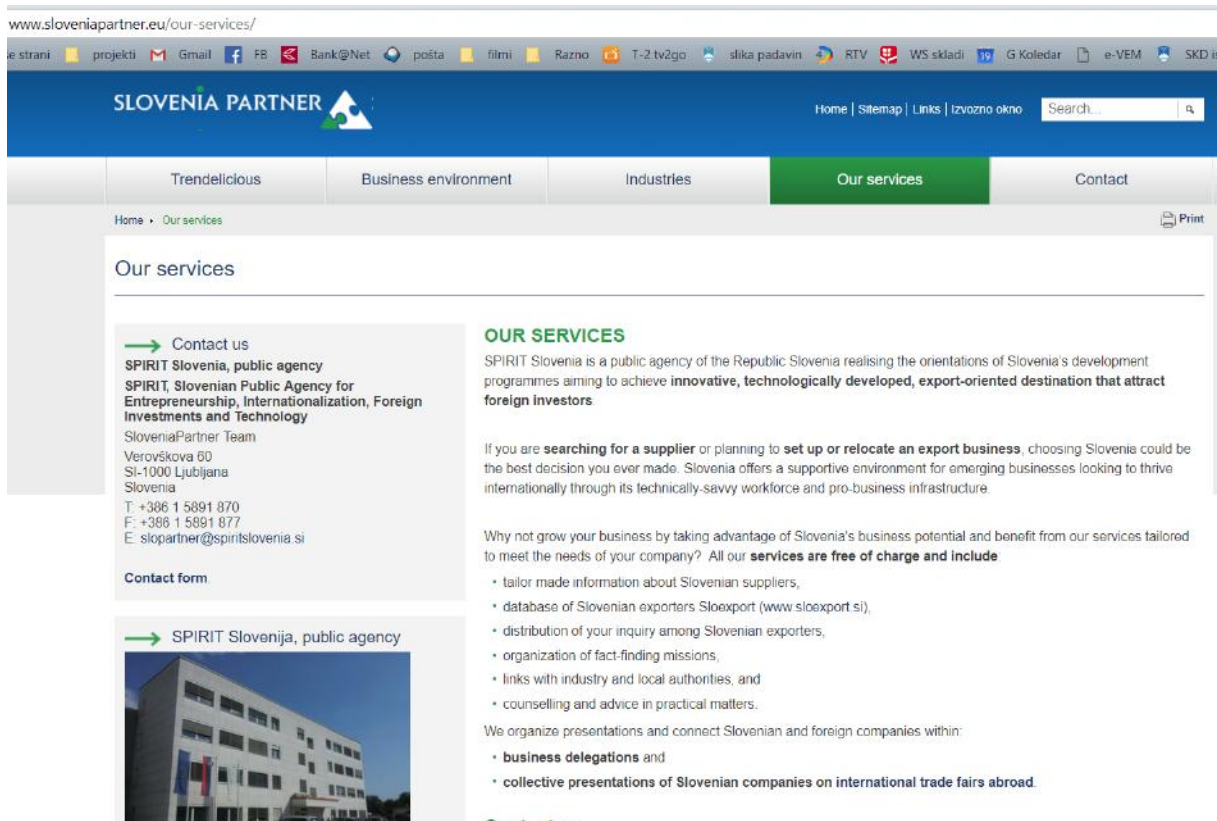

Figure 10: Information about Slovenia for business partners.

**GOOD PRACTICE**

*The information about Slovenia on pages Investslovenia.si and Sloveniapartner.eu including the search for investment locations and business opportunities are the elements that could be integrated into the platform of the project E-CONOMY.*

**4.1.2 SPOT - Slovenia Business Point (E-VEM)**

One of the most used services at SPOT points is the registration of a company, which is free of charge. In addition, several other administrative services connected with starting up a business operation free of charge can be done at these points. E-VEM (E-SPOT) portal enables registration procedures.

The page Slovenia Business Point gives all the information about the EUGO portal that a business person will need. The Eugo Slovenian portal is a state business point that helps foreign business entities from the EU, EEA Member Countries and the Swiss Confederation who want to do business in Slovenia.

## SPOT - Slovenska poslovna točka

V okviru podpornih storitev države za poslovne subjekte se uvaja nov nacionalni sistem **SPOT, Slovenska poslovna točka**. Pod okrilje Slovenske poslovne točke postopoma prehaja tudi dosedajni sistem VEM, tako točke VEM kot portal za podjetja in podjetnike e-VEM.

Cilj je vzpostavitev celovitega sistema **brezplačnih** podpornih storitev države za poslovne subjekte pod enotno znamko. Sistem SPOT bo poslovnim subjektom, podjetnikom in potencialnim podjetnikom nudil nove in izboljšane elektronske storitve, storitve podjetniškega svetovanja, informiranja in podjetniškega usposabljanja ter obogaten nabor storitev s področja internacionalizacije in tujih investicij.

### Sistem SPOT, Slovenska poslovna točka združuje štiri nivoje

**Portal SPOT (e-VEM) - Informacije in elektronske storitve za poslovne subjekte**

Prvi nivo sistema in znamke SPOT, Slovenska poslovna točka, predstavlja **portal e-VEM oz. v prihodnje portal SPOT - [spot.gov.si](http://spot.gov.si)**

Portal predstavlja **uradno spletno stran sistema SPOT**. Na portalu so na voljo podrobnejše informacije o celotnem sistemu SPOT, predstavljeni so različni nivoji sistema, njihove naloge in pristojnosti, na voljo so informacije o točkah SPOT, kontaktih, naslovi, seznamih in zemljevid točk SPOT.

Portal e-VEM (portal SPOT) še naprej ostaja ključni portal za podjetnike in poslovne subjekte in horizontalno povezuje različne institucije in pristojne organe s katerimi gradimo storitve za poslovne subjekte. Cilji portala so še naprej usmerjeni **k zagotavljanju enostavnega, hitrega in brezplačnega poslovanja podjetnikov in poslovnih subjektov z državo**.

Na portalu e-VEM potekajo postopne vsebinske in tehnične nadgradnje. Uporabnikom bodo na voljo nove in nadgrajene elektronske storitve in vsebine o pogojih za poslovanje. Načrtovane aktivnosti bodo vključevale tudi celovito spremembo imena iz portala e-VEM v portal SPOT. Prenova se izvaja v okviru projekta Enotna poslovna točka, ki ga vodi Ministrstvo za javno upravo.

## Točke SPOT Registracija (VEM točke)

### Registracije podjetij s pomočjo svetovalca

Drugi nivo sistema SPOT predstavljajo fizične »registracijske« točke za podporo poslovnim subjektom. Gre za dosedanje točke VEM, kjer uporabnik s pomočjo referenta opravi postopke v okviru portala SPOT (dosedanji portal e-VEM).

Vse storitve, ki jih nudijo točke **SPOT Registracija**, so brezplačne. Storitve točk **SPOT Registracija** se izvajajo na:

- Izpostavah AJPES,
- Upravnih enotah (UE),
- organizirane so tudi v okviru Gospodarske zbornice Slovenije (GZS),
- Obrtno-podjetniške zbornice Slovenije (OZS) in
- drugih zbornic, ki imajo status točke SPOT Registracija.

## Točke SPOT Svetovanje

### Podjetniško svetovanje in regionalno povezovanje

SPIRIT Slovenija, javna agencija prek mreže slovenskih poslovnih točk SPOT svetovanje zagotavlja celovite brezplačne podpirne storitve potencialnim podjetnikom in podjetjem v vseh fazah razvoja na **12 lokacijah po Sloveniji**. Regijsko organizirane točke SPOT svetovanje poleg izvajanja postopkov registracije, izbriisa in statusnih sprememb nudijo širok razpon storitev:

- **informiranje**, v smislu rednega in ažurnega obveščanja strank o aktivnostih, razpisih in dogodkih na področju spodbujanja podjetništva;
- **usposabljanja in delavnice**, katerih namen je krepiti znanje, veščine in kompetence sodelujočih na področjih povezanih s spodbujanjem podjetniške kulture;
- **osnovno svetovanje strankam** na področjih, ki segajo vse od priprave poslovnih načrtov, marketinga in vodenja podjetij, pa tudi do internacionalizacije podjetij ter državnih spodbud, pri čemer lahko tovrstno svetovanje poteka bodisi telefonsko ali preko e-pošte, pretežno pa z obiskom stranke na lokaciji SPOT regije;
- **animiranje in povezovanje regionalnega okolja** z namenom ustvariti tesnejše sodelovanje med vsemi akterji v regiji, vključno s podjetniki, v to dejavnost pa sodi tudi organizacija dogodkov čezmejnega povezovanja s sorodnimi institucijami v sosednjih državah;
- **izmenjava dobrih praks in odpiranje novih poslovnih priložnosti** znotraj Slovenije, kot tudi čezmejno tako za potencialne podjetnike kot tudi za majhna in srednje-velika podjetja.
- **sooblikovanje podpornega okolja za poslovne subjekte**, kar vključuje poročanje o zaznanih administrativnih ovirah s strani svetovancev, srečanje podpornega okolja v regiji ter predstavitev produktov regijskih podjetij na enem razstavnem mestu v regiji.

Točke SPOT Svetovanje so sofinancirane s pomočjo Evropskega sklada za regionalni razvoj: [www.eu-skladi.si](http://www.eu-skladi.si), Ministrstva za gospodarski razvoj in tehnologijo: [www.mgrt.gov.si](http://www.mgrt.gov.si) ter SPIRIT Slovenija, javna agencija: [www.spiritslovenia.si](http://www.spiritslovenia.si).

### 4.1.3 Other state and professional institutions

#### 4.1.3.1 AJPES

State agency AJPES manages the Slovenian Business Register as a central public database on all business entities, their subsidiaries, and other organization segments located in Slovenia which perform profitable or non-profitable activities. ePRS enables search for information about business entities involved in a profit or non-profit activity having their principal place of business located on the territory of the Republic of Slovenia.

Annual reports intended for the public – except those of nonprofit organizations – can be viewed without charge. For companies with a mandated statutory audit, AJPES publishes audited annual reports. EBR's (European Business Register) information system provides users with simple and easy access to data on business entities from all members of EBR. It also enables the ordering of various documents connected to the companies' business operations.

The information is available in Slovene and English.

The screenshot shows the AJPES website interface. At the top, there is a search bar with the text "Iskalnik po poslovnih subjektih" and "Evropski poslovni register". Below the search bar, there is a section titled "Novi Fi=Po Finančni pomočnik" with a description in Slovene. The main content area is titled "AJPES STORITVE" and contains a grid of service cards:

#### 4.1.3.4 Employment Service of Slovenia

Employment Service of Slovenia is one of the key Slovenian labour market institutions. It is an independent legal entity with public institute status operating uniformly across the entire country.

Main ESS activities:

- employment advice and jobbroking
- life-long career guidance
- unemployment benefit and unemployment insurance
- implementation of active employment policy (AEP) measures and programmes
- issuing of work and employment permits for foreign workers
- preparation of analytical, development and other professional materials related to ESS activities
- labour market (LM) and ESS information of a public nature

Users of ESS services are unemployed persons, employers, jobseekers, pupils and students who need professional help in the fields of employment and career guidance, professional institutions, providers of active employment policy programmes, social partners and general public.

The screenshot shows the homepage of the Employment Service of Slovenia (ZRS). The header includes the website name and URL, a search bar, and navigation links. The main content area is divided into three sections:

- Iskalci zaposlitve (Jobseekers):** Shows 2619 vacant job positions. Includes a button for "PROSTA DELOVNA MESTA" and a list of services like "Prijava pri Zavodu" and "Programi za iskalce zaposlitve".
- Delodajalci (Employers):** Shows 78.555 jobseekers. Includes a button for "POIŠČITE KANDIDATA" and a list of services like "Objavite prosto delovno mesto" and "Fisame za delodajalce".
- Mladi iskalci zaposlitve (Young jobseekers):** Features a photo of young people and a list of services like "Iskalnik po ukrepih za mlade" and "Prijava na Zavod za zaposlovanje".

**Bar bodies and chairpersons**

**about the bar**

The Bar - as a part of the judiciary - is an autonomous and independent service, regulated by law (Article 137 of the Constitution of the Republic of Slovenia).

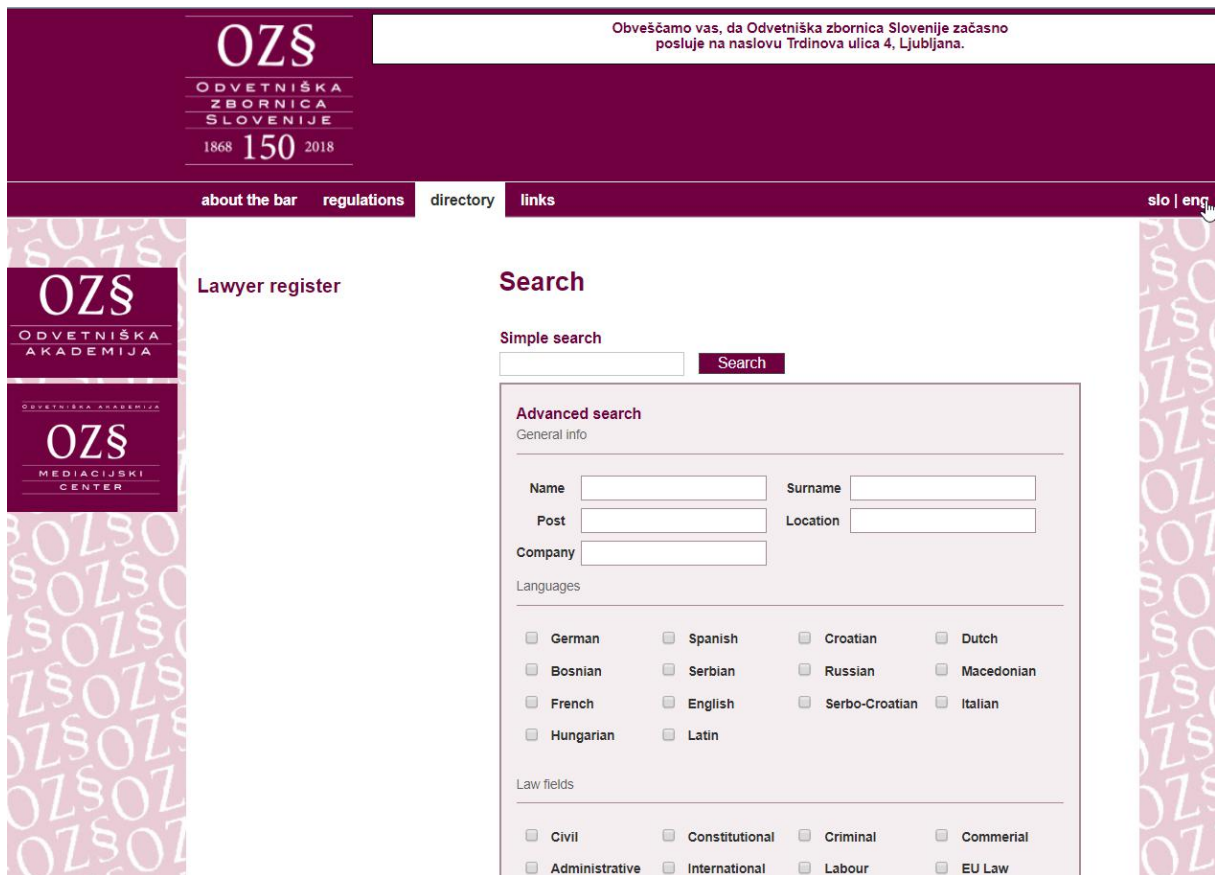

The Bar is an honorable profession rooted in the Antique and it has preserved its good reputation to the present day. Throughout the centuries, the good reputation of lawyers as legal experts has been growing, but the development and the way of living have led to the situation that the Bar has become a must. The Bar as a part of the judiciary has been autonomous and independent, practiced by lawyers as legal experts. The principle of lawyers' independence exists since 1868. Lawyers are legal experts, performing their free-lance activities autonomously and independently, with due responsibility to their clients.

On the territory of Slovenia, the Bar exists as an organized activity for as many as 135 years. The Lawyers' Order (Advokaten Ordnung), being the most excellent law ever existing in our country, was adopted in 1868, however preceded by a provisional Lawyers' Order adopted already in 1849. By now Slovenia has had ten Bar Acts, the latest in force the one adopted in 1993, amended in 1996 and 2001.

The activity of the Slovene Bar is definitely based on the provision of Article 137 of the Constitution of the Republic of Slovenia, as quoted above, on the Bar Act, on the Code of Conduct for Lawyers (1994, amended in 2001), on the Lawyers' Tariff (2003) as well as on numerous internal acts of the Bar Association. Moreover, it is necessary to mention several international documents and relevant deeds, in particular the EU Directives and the Code of Conduct for Lawyers in the EU - by CCBE, the officially recognized all-European professional organization of lawyers, combining within the scope of the European Community both national organizations and delegations of observers from other European countries.

The Slovene Bar Association consists of 11 regional assemblies whereof the membership is based on territorial and functional principles. Their territories predominantly coincide with the territories of District Courts.

BAR ASSOCIATION OF SLOVENIA

The screenshot shows the website of the Chamber of Notaries of Slovenia (OZS). The header includes the OZS logo and the text "ODVETNIŠKA ZBORNICA SLOVENIJE" with the years "1868 150 2018". A navigation menu contains "about the bar", "regulations", "directory", and "links". A language selector shows "slo | eng".

The main content area is divided into two sections:

- Lawyer register:** A vertical sidebar on the left with the OZS logo and "ODVETNIŠKA AKADEMIJA" and "OZS MEDIACIJSKI CENTER".
- Search:** A search interface with a "Simple search" field and a "Search" button. Below it is an "Advanced search" form with the following fields:
  - General info: Name, Surname, Post, Location, Company.
  - Languages: A grid of checkboxes for German, Spanish, Croatian, Dutch, Bosnian, Serbian, Russian, Macedonian, French, English, Serbo-Croatian, Italian, Hungarian, and Latin.
  - Law fields: A grid of checkboxes for Civil, Constitutional, Criminal, Commercial, Administrative, International, Labour, and EU Law.

Figure 19: Bar [www.odv-zb.si](http://www.odv-zb.si).

#### 4.1.3.6 Chamber of Notaries of Slovenia

The Chamber of Notaries of Slovenia is committed to ensure and monitor the Notariat's reputation, authenticity and development, represent interests of notaries, assistant notaries and notarial candidates as well as perform other tasks pursuant to the Chamber's laws, regulations and the Article of Association. The Chamber exercises its powers through the following bodies: the Assembly, the Executive Committee, the Audit Committee, and the Disciplinary Committee.

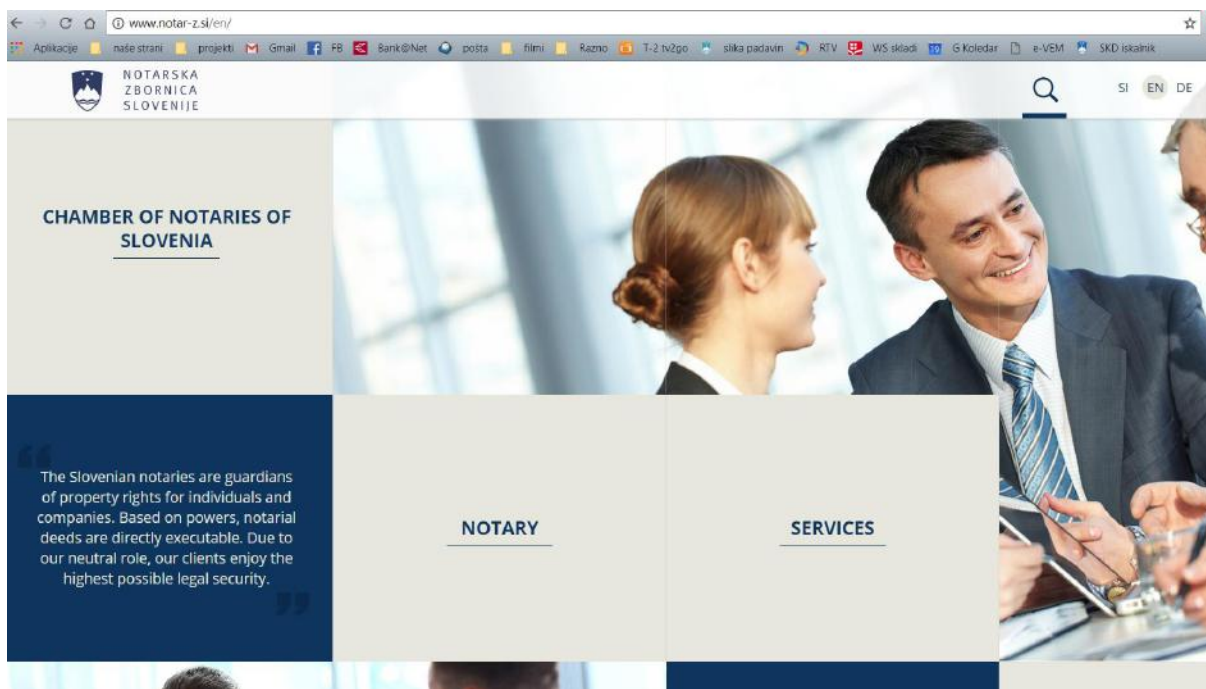

Figure 20: Chamber of Notaries of Slovenia.

You can find contact details of a notary anywhere in the European Union who speaks your language with the use of the European Directory of the Notaries. With this directory, you can for example find a notary in another EU member state who speaks English and who can help you with your dealings there (purchase of a property, settlement of a succession, property relations between spouses, etc.). You can choose one of the EU's 23 official languages and a country where you wish to find a notary (with the option of selecting a town) and obtain the required information.

DELOVNA PODROČJA | OBRAZCI, EVIDENCE, MNENJA, STORITVE | **IZOBRAŽEVANJE V PRAVOSODJU - CIP** | MEDIJSKO SREDIŠČE | ZAKONODAJA IN DOKUMENTI | O MINISTRSTVU

WWW.MP.GOV.SI / IZOBRAŽEVANJE V PRAVOSODJU - CIP / SODNI IZVEDENCI IN SODNI CENILCI

**SODNI IZVEDENCI IN SODNI CENILCI**

Sodni izvedenci so osebe, imenovane za neomejen čas s pravico in dolžnostjo, da sodišču na njegovo zahtevo podajo izvid in mnenje glede strokovnih vprašanj, za katera tako določa zakon ali glede katerih sodišče oceni, da mu je pri njihovi presoji potrebna pomoč strokovnjaka.

[Seznam sodnih izvedencev](#)

Sodni cenilci so osebe, imenovane za neomejen čas s pravico in dolžnostjo, da sodišču na njegovo zahtevo podajo izvid o gospodarskih lastnostih stvari ali pravice ter cenitev njene vrednosti oziroma vrednosti na njej povzročene škode.

[Seznam sodnih cenilcev](#)

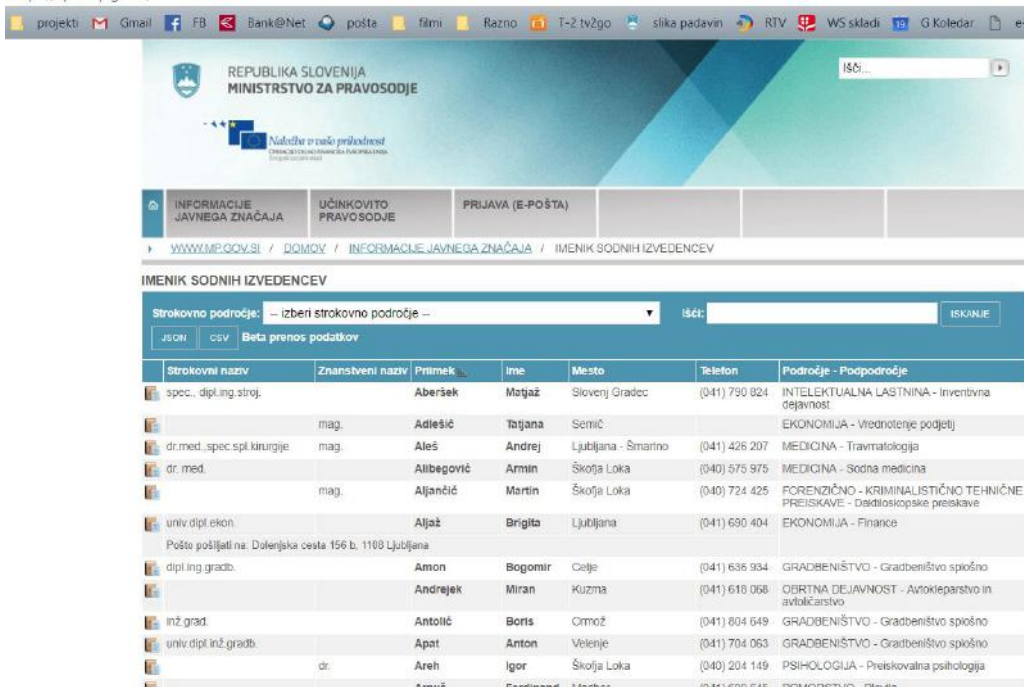

**OBVESTILO**

V Uradnem listu RS z dne 13. 3. 2015 je bil objavljen Zakon o spremembah in dopolnitvah Zakona o sodiščih (ZS-L), ki je pomembno posegel tudi na področje sodnih izvedencev, sodnih cenilcev in sodnih tolmačev. V okviru navedenega področja novela spreminja 85. člen (sklepevanje sodnih izvedencev, cenilcev in tolmačev na svoj status) ter 86. člen (uvredba t. i. pozitivnega sistema) zakona.

Uvedba pozitivnega sistema se prične uporabljati s trenutkom uveljavitve omenjene zakonske novole (28. marca 2015). Postopki za imenovanje sodnih izvedencev, sodnih cenilcev in sodnih tolmačev, ki so se začeli pred uveljavitvijo zakona (torej pred 28. marcem 2015), pa se bodo končali po do sedaj veljavnih predpisih. Navedeno pomeni, da bo ministristvo vse vloge za imenovanje sodnih izvedencev, sodnih cenilcev in sodnih tolmačev, ki jih bo prejelo do uveljavitve zakona, obravnavalo skladno z zakonodajo, ki je veljala do uvedbe pozitivnega sistema. Vloge, ki bodo na Ministrstvo za pravosodje prispjele po omenjenem datumu, bodo zavrnjene (pravne podlage za njihovo obravnavo namreč ne bo več).

Namesto individualne obravnave vlog bo Ministrstvo za pravosodje pričelo z aktivnostmi v smeri uvedbe t. i. pozitivnega sistema. Slednje pomeni, da bo ministristvo dvakrat letno objavilo javni poziv k predložitvi vlog za imenovanje sodnih izvedencev, sodnih cenilcev in sodnih tolmačev. Poziv se bo objavi glede na izkazane potrebe, ki jih bo ministristvo ugotavljalo na podlagi obrazloženih mnenj predsednikov sodišč. S posameznim pozivom bodo tako k oddaji vlog vabljeni zgolj tisti kandidati, katerih strokovno področje oziroma jezik bosta identificirana v okviru potrebe po imenovanju.

» PREDSTAVITEV ZBORNICI, VIZIJA IN POSLANSTVO

Davčni svetovalci Slovenije smo se več kot 15 let strokovno združevali najprej v delu Društva davčnih svetovalcev, ki je že leta 1999 postalo tudi polnopravni član evropskega profesionalnega združenja CFE.

Ko so se z uveljavitvijo novega zakona o zbornicah ustvarile povsem nove razmere za organizacijo in delovanje, smo davčni svetovalci ustanovili strokovno zbornico, ki bo v novih okvirih in z možnostjo sodelovanja bistveno večjega števila svojih rednih članov imela dosti pomembnejšo vlogo na področju strokovne pomoči davčnim zavezancem v davčnih postopkih kot tudi pri razvoju davčnega sistema v Sloveniji.

Verjamemo, da je v strokovni slogi in našem poklicnem združenju takšna zbornica in njeno redno delovanje več kot nujno potrebna ne samo za davčne svetovalce, temveč tudi za vse slovenske davkoplačevalce.

Presodite in se nam pridružite. Postanite tudi vi aktivni sokreator našega skupnega dela v novih okvirih in vsebinah!

#### 4.1.4.3 Embassy of Slovenia in Budapest

The screenshot shows the official website of the Embassy of the Republic of Slovenia in Budapest. The page features a navigation menu on the left with categories such as Embassy, Slovenians in Hungary, Political relations, Economic Cooperation, Consular information, Culture and education, Discover Slovenia, Useful links, and Newsroom. The main content area includes a welcome message, contact information for the embassy (68 Cseppekó Street, Budapest), and a list of social media links for Facebook and Twitter. A featured article titled 'The Forthcoming Declaration of »World Bee Day«' is displayed, dated 18.12.2017. The page also includes a sidebar with 'CURRENT LINKS' and a 'Plečnikova Ljubljana' banner.

Figure 27: Embassy of Slovenia in Budapest.

#### 4.1.4.4 The Slovene-Hungarian Business Association

*The Slovene-Hungarian Business Association was founded in 2009 to provide a successful community for Slovene companies in Hungary and those Hungarian entities that are interested in the Slovene market. The Association offers a platform for information exchange and provides a possibility for efficient promotion and interest protection. Recently, the Association has seen fast membership growth, which is a perfect proof of the necessity for our community and growing business cooperation.*

*Their aim is to have an active role in the development of business contacts between Slovenia and Hungary, to advise and provide information to government authorities and other business role-players; therefore, we aim at close cooperation with political and economic organisations.*

## 4.1.5 Chambers of Commerce and Industry

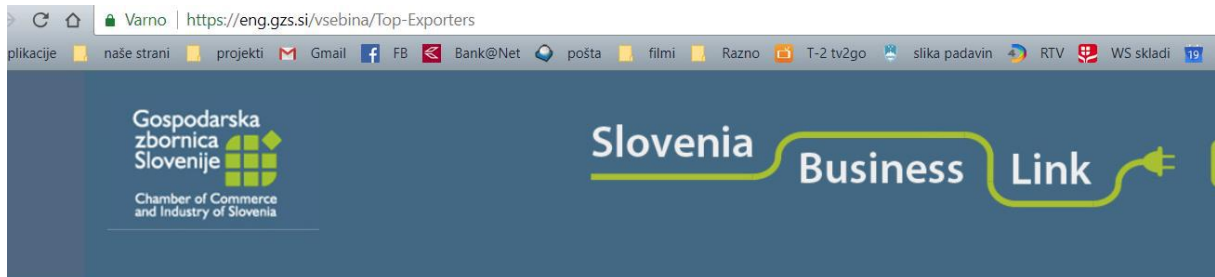

### 4.1.5.1 Chamber of Commerce and Industry of Slovenia

The Chamber of Commerce and Industry of Slovenia (CCIS) is the strongest and the most influential business link in Slovenia. It provides essential services for enterprises operating in Slovenia, and it is the ideal local partner for foreign investors. The CCIS was founded more than 160 years ago and now has 7,000 member-companies of all sizes and from all regions. It is a non-profit, non-governmental, independent business organization representing the interest of its members and is Slovenia's most influential business association. CCIS unites under its roof 24 branch associations representing all sectors of Slovenian Economy. CCIS operates a network of 13 regional chambers.

Plan dela 2018 | KOMENTAR Gospodarske zbornice Slovenije

**KOMENTAR**

**Komentar GZS**  
Ob robu zahtev javnega sektorja: enačba se ne izide (.pdf)

Sistem, v katerem mora čedalje manj aktivnega prebivalstva (vsako leto 8.000 manj) ustvarjati sredstva za rastoče skupine upokojenih (616.000), zaposlenih v javnem sektorju (177.000) in še vedno visoke številke brezposelnih (88.000), preprosto ni vzdržen. Generalna direktorica GZS Sonja Šmuc: »Bistveno vprašanje ni več, koliko podjetji bo uspelo prenesti še višje stroške obdavčitve in ostati mednarodno uspešnih, ampak koliko mladih bo še pripravljeno pristati na zanje tako neupodabnem medgeneracijskem dogovoru.«

#### 4.1.6 Chambers of Craft

The Chamber of Craft and Small Business of Slovenia is an umbrella organisation comprising the craft and small business chamber system jointly with 62 regional chambers of craft and small business. The Chamber of Craft and Small Business of Slovenia and the regional chambers of craft and small business are independent legal entities managed by craftsmen – officials (functionaries) – on a voluntary basis.

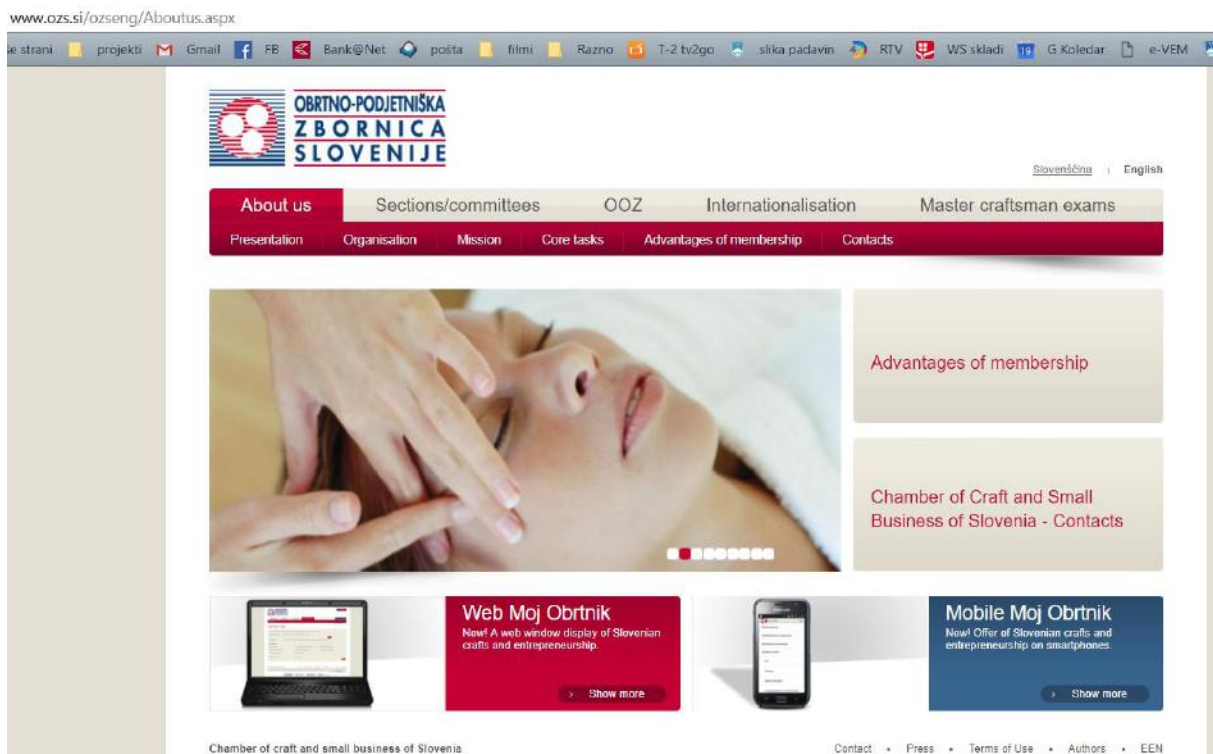

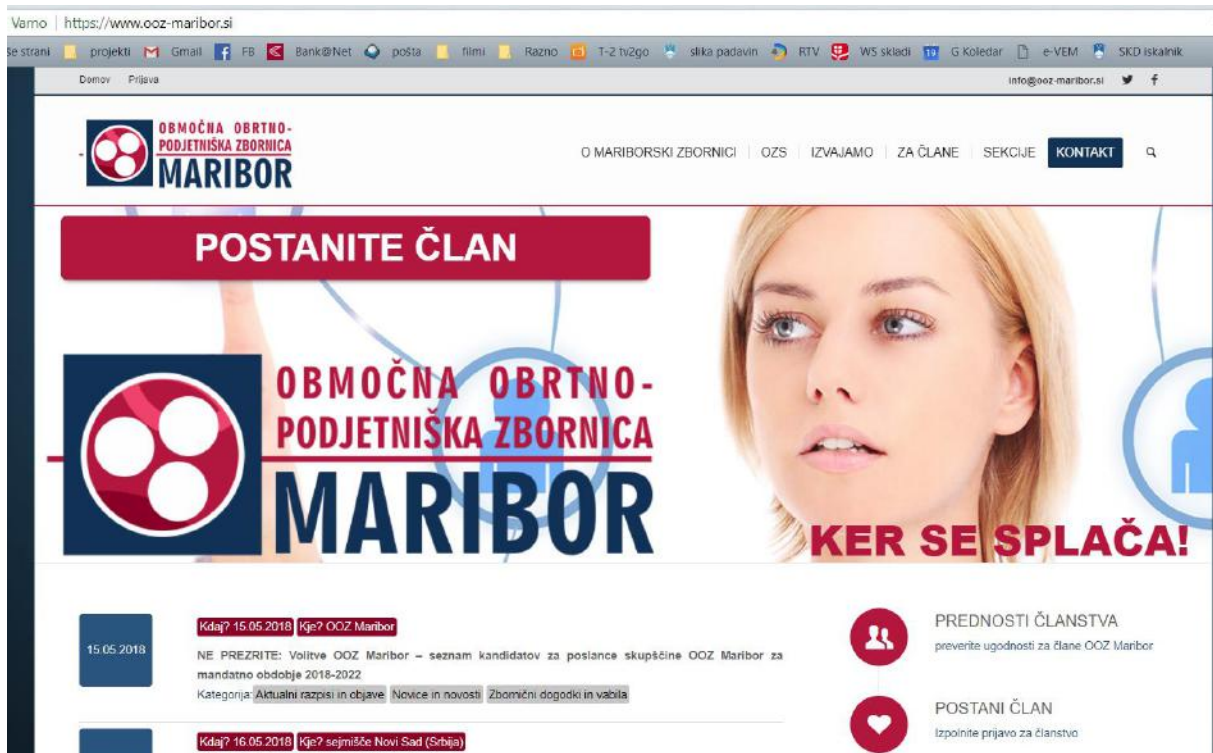

Figure 32: The Chamber of Craft and Small Business of Slovenia.

The screenshot shows the homepage of the website www.ooz-maribor.si. At the top, there is a navigation bar with the logo of the 'OBMOČNA OBRTNO-PODJETNIŠKA ZBORNICA MARIBOR' and a menu with links for 'O MARIBORSKI ZBORNICI', 'OZS', 'IZVAJAMO', 'ZA ČLANE', 'SEKCIJE', and 'KONTAKT'. Below the navigation bar is a large banner with the text 'POSTANITE ČLAN' in a red box, followed by the organization's logo and name 'OBMOČNA OBRTNO-PODJETNIŠKA ZBORNICA MARIBOR'. To the right of the banner is a photograph of a woman's face and the text 'KER SE SPLAČA!'. Below the banner, there are two news items. The first news item is dated '15.05.2018' and is titled 'NE PREZRITE: Volitve OOO Maribor – seznam kandidatov za poslance skupščine OOO Maribor za mandatno obdobje 2018-2022'. The second news item is dated '16.05.2018' and is titled 'Kje? sejmišče Novi Sad (Srbija)'. On the right side of the page, there are two call-to-action buttons: 'PREDNOSTI ČLANSTVA' (Benefits of Membership) and 'POSTANI ČLAN' (Become a Member).

## 4.1.7 University of Maribor

https://www.um.si/en/Pages/default.aspx

The screenshot shows the homepage of the University of Maribor. At the top, there is a navigation bar with the university logo and language options (SLO | ENG). Below this is a main banner area with a large heading: "Call for enrollment into Postgraduate Study Programmes in Academic Year 2018/2019 available now". To the right of the banner are three smaller promotional tiles. Below the banner is a horizontal menu with categories: ABOUT, STUDY, RESEARCH, DEVELOPMENT AND INNOVATIONS, INTERNATIONAL RELATIONS, and QUALITY. The main content area is divided into three columns. The left column is titled "UM NEWS" and contains two news items: "THE LET'S GUIDE ON-LINE PLATFORM IS ALREADY AVAILABLE" and "CALL FOR ENROLMENT INTO POSTGRADUATE STUDY PROGRAMMES OF THE UNIVERSITY OF MARIBOR FOR THE ACADEMIC YEAR 2018/19". The middle column is titled "EVENTS" and lists three events: "Monday, 14.5.2018 Konferenca, FS", "Monday, 14.5.2018 3. mednarodno EPNOE srečanje mladih znanstvenikov: Novi dosežki temeljnih in aplikativnih raziskav polisaharidnih materialov", and "Monday, 14.5.2018 Degodek, UM Javna predstavitev kandidatov za rektorja Univerze v Mariboru". The right column is titled "FOLLOW US" and includes social media icons for Twitter, Facebook, and YouTube, as well as a "QUICK LINKS" section with logos for "ra2.um" and "Student's union".

## Knowledge and Technology Transfer

University of Maribor successfully transfers knowledge and technologies to the economic and social environment. Support for the activities of researchers and students of the University of Maribor in the field of knowledge and technology transfer is carried out by the Knowledge and Technology Transfer Office, which provides researchers and students of the University of Maribor assistance in the protection and commercialization of their know-how, technologies and ideas. The activity of the Knowledge and Technology Transfer Office thus makes an important contribution to the realization of the mission of the University of Maribor, i.e. to contribute to the development of society, addressing global challenges and economic progress in the region and the wider area.

The Knowledge and Technology Transfer Office helps researchers and students of the University of Maribor to achieve greater visibility and a greater impact of research results, which are increasingly important factors in obtaining funding for research work.

The Technology and Knowledge Transfer Office is also responsible for conducting the process of acquiring employee inventions at the University of Maribor.

E-mail: tto@um.si

Figure 35: University of Maribor.

TechnoCenter at the University of Maribor was established in 2005 as a Technology Transfer Office. Its mission is to provide services for promoting and supporting technology and knowledge transfer, thus contributing to national and especially regional economic development.

The most important goals include:

- transfer of knowledge and new technologies to industry;
- greater diversity of research activities and increased support for research at faculties;
- creating innovation culture;
- protection and management of intellectual property;
- connecting industry and public research organizations to achieve greater synergy.

The Chancellor of University of Maribor transferred these activities to Službo za prenos znanja in tehnologij in 2017.

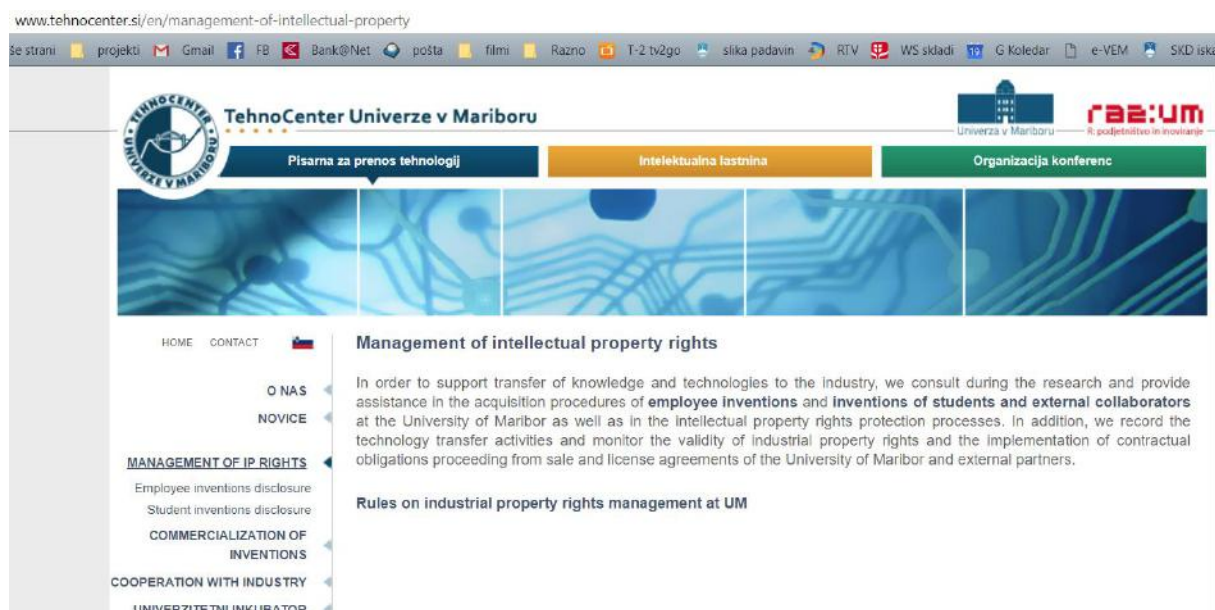

Figure 36: TechnoCenter at University of Maribor.

## 4.1.8 Development agencies

### 4.1.8.1 ZRS Bistra Ptuj /SRC Bistra Ptuj

Scientific Research Centre Bistra Ptuj (SRC Bistra Ptuj) is a regional development agency but also a research centre and has been extensively involved in EU projects. Core activities of the institution include: promotion of sustainable regional development in the region constituted of 16 municipalities on all areas of work on a local level, establishment of links among administration, universities, research institutions and business, transfer of scientific and economic knowledge to SMEs, promotion and creation of knowledge in order to stimulate human resources with improved skills and competences in the region.

There are 15 highly skilled employees experienced in project work at SRC Bistra Ptuj including 5 Ph.D.s and a MSc. Special target groups are entrepreneurs and companies, especially the young ones. The task group for promotion of entrepreneurship contributes to supporting conditions for business development. Entrepreneurs get full support, from business idea development, company foundation to expansion and growth. Individuals can establish a company at the one-stop-shop free of charge at SRC Bistra Ptuj.

**ZRS Bistra Ptuj spodbuja podjetništvo v Spodnjem Podravju**  
Poslanstvo ZRS Bistre Ptuj je podpora razvoju v Spodnjem Podravju.  
Podjetja v regiji spodbujamo od ustanovitve do zrelosti. Pri nas je možno ustanoviti podjetje na SPOT (Slovenska poslovna točka) in ta storitev je za prebivalce brezplačna, ker poteka v okviru programa SPIRIT Slovenija.  
Novim in obstoječim podjetnikom pomagamo pri pripravi poslovnih načrtov, patentiranju in zaščiti blagovnih znamk, pri pridobivanju sredstev za raziskave, rast in razvoj ter sodelujemo pri reševanju tehnoloških problemov.  
Skupaj z industrijo in institucijami znanja podiplomske doktorske študente usposabljamo za reševanje konkretnih problemov. Kot mentorji jih pripravljamo na samostojno razvojno delo v podjetjih.

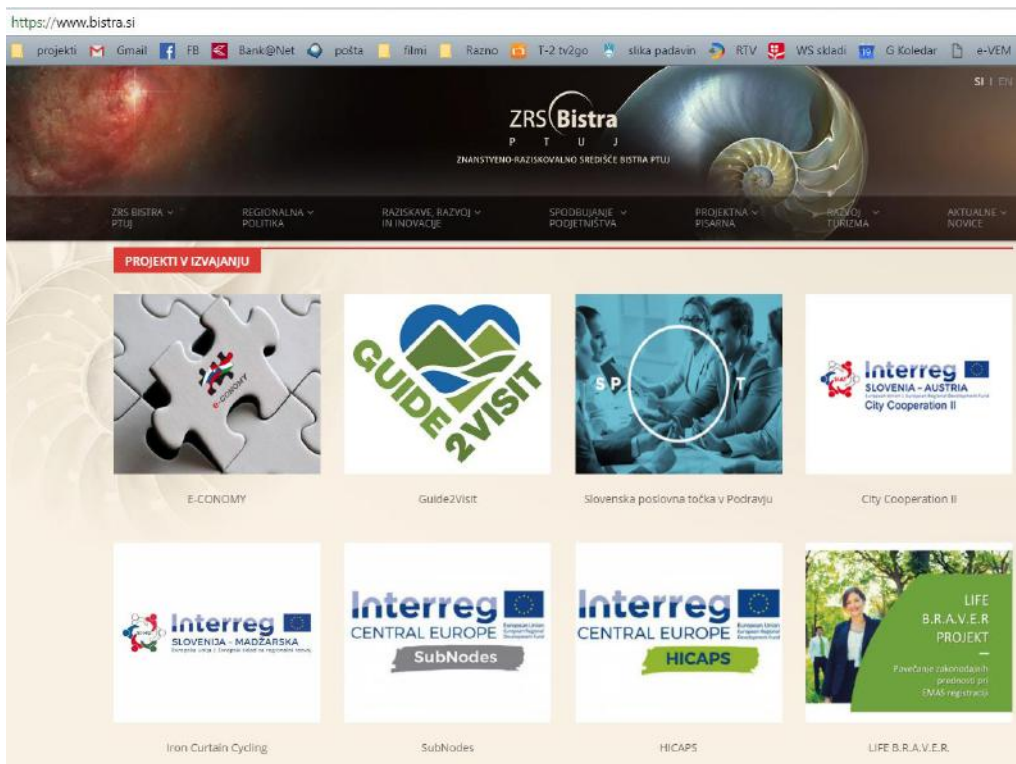

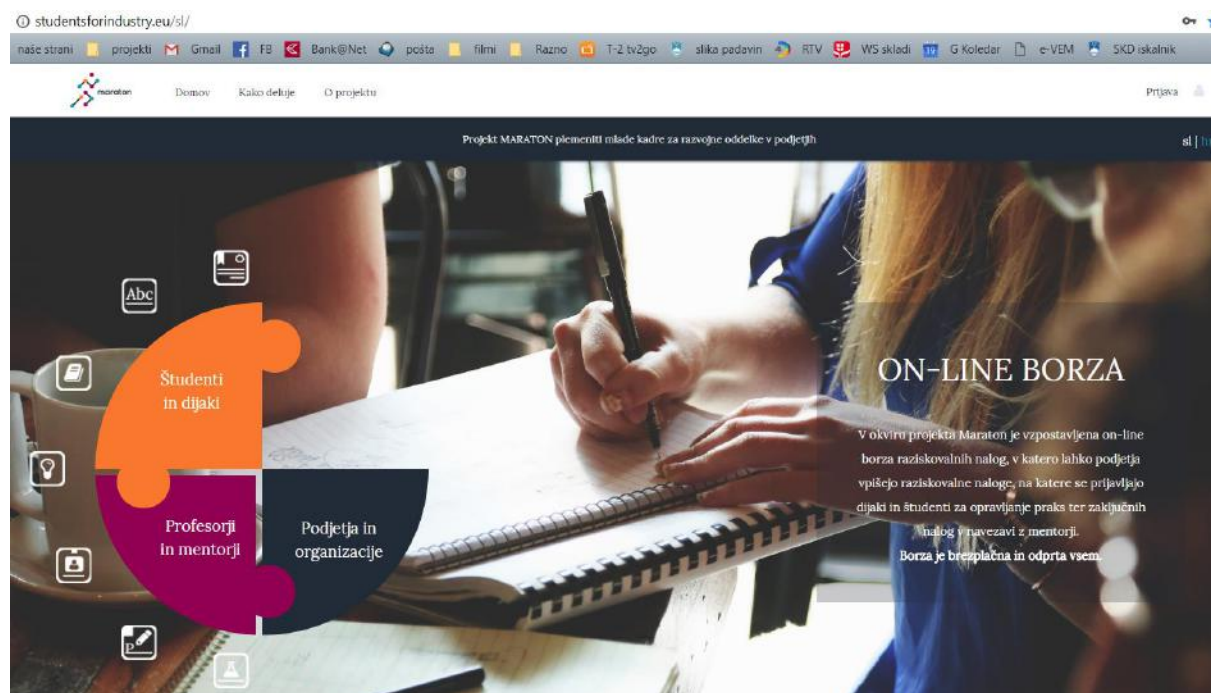

Figure 37: www.bistra.si.

The aim of the SI-HR cross-border project MARATON was to enhance business cooperation, especially concerning SMEs with RD institutions. This should stimulate the development of new products, services and technologies that result in higher added value and improve the competitive position of SMEs. A cross-border product was developed and heavily promoted. This product is an online exchange of student projects, which was defined by companies. The students can apply to publish projects of their interest and use them also to fulfil curriculum demands. A higher education researcher was involved in the project as a mentor. The online exchange is free and open to everybody. Information on concrete industrial research projects available online will encourage also cross-border cooperation.

Beside target linkages such as company-student-researcher links, also company-company links could be formed raising bilateral business cooperation of companies challenged by similar or compatible problems. The same is expected for researchers. This can trigger a domino effect of further cooperation over the project area.

The additional added value of the project lies in facilitating the employment of research workers as well as the cross-border exchange of business ideas and human resources.

## Kako deluje?

**REGISTRACIJA**  
Registriraj se kot student/dijak, podjetje/organizacija ali kot profesor/mentor ter se poveži z ostalimi uporabniki. Pomembno je, da ob registraciji izbereš ustrežna področja delovanja.

**ISKANJE**  
Ena ključna beseda je dovolj, da najdeš kar potrebuješ. Vpiši jo v iskalnik in brskaj med podjetji, mentorji ali drugimi študenti, ki imajo razpisane vnose. Nato se poveži z uporabniki s prijavo na vnos ali preko zasebnega sporočila. Vpiši jo v iskalnik in brskaj med podjetji, mentorji ali drugimi študenti, ki imajo razpisane vnose. Nato se poveži z uporabniki s prijavo na vnos ali preko zasebnega sporočila.

**USTVARJANJE VNOSA**  
Sam ustvari nov vnos in k sodelovanju povabi uporabnike, ki jih potrebuješ, ali pa izbiraj med uporabniki, ki se k tvojemu vnosu prijavijo sami. Nov vnos ustvariš tako, da o njem izpolniš osnovne podatke ter določiš datum, do katerega se lahko uporabniki nanj prijavijo. Nato označiš, katere/ga izmed treh skupin uporabnikov potrebuješ, ter na katerem področju najposamezen uporabnik deluje.

**Raziskava** **Ostalo** **Zaključna naloga** **Seminarska naloga** **Praksa** **Projektna naloga** **Lektoriranje / prevajanje**

Specific SI-HR cross-borders objectives of the project EnterYouth were:

- Fostering an entrepreneurial mind set of youth in the cross-border area. The aim was to develop cross-border training of young people who are still in regular education system and young unemployed people who are planning to establish and develop their own company. These include: 1. Application for business plans and 2. Online game Kesh Up, which simulates the business processes.
- Strengthening economic knowledge and business skills of entrepreneurs. Entrepreneurs that are managing their own companies need more specialized skills to confirm and strengthen their knowledge, to develop new skills and knowledge for managing business, and to exchange experiences and information with other entrepreneurs.

#### 4.1.8.2 Maribor Development Agency

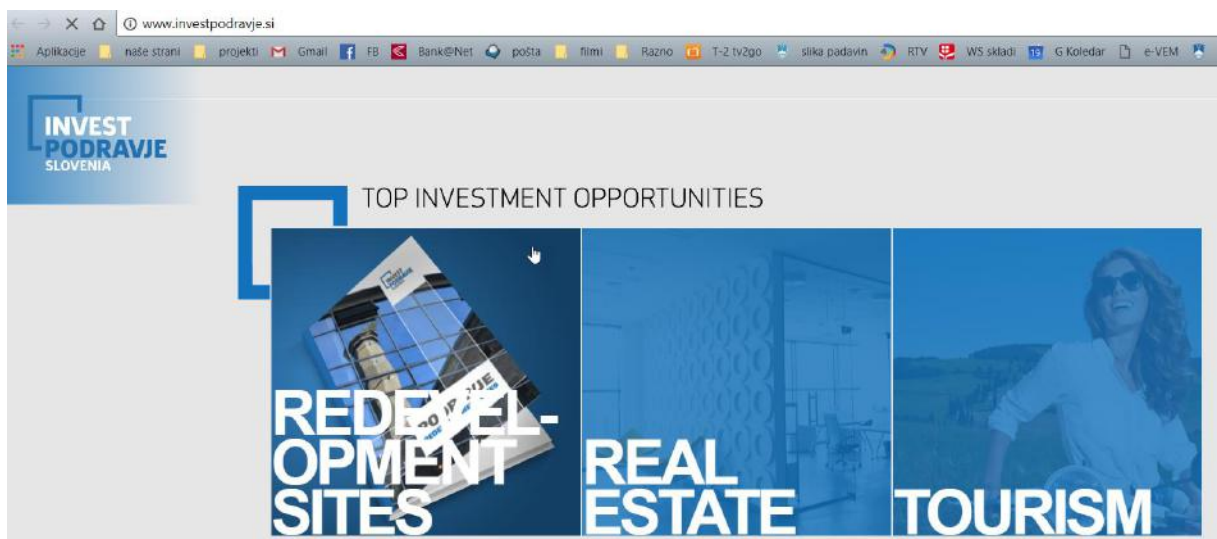

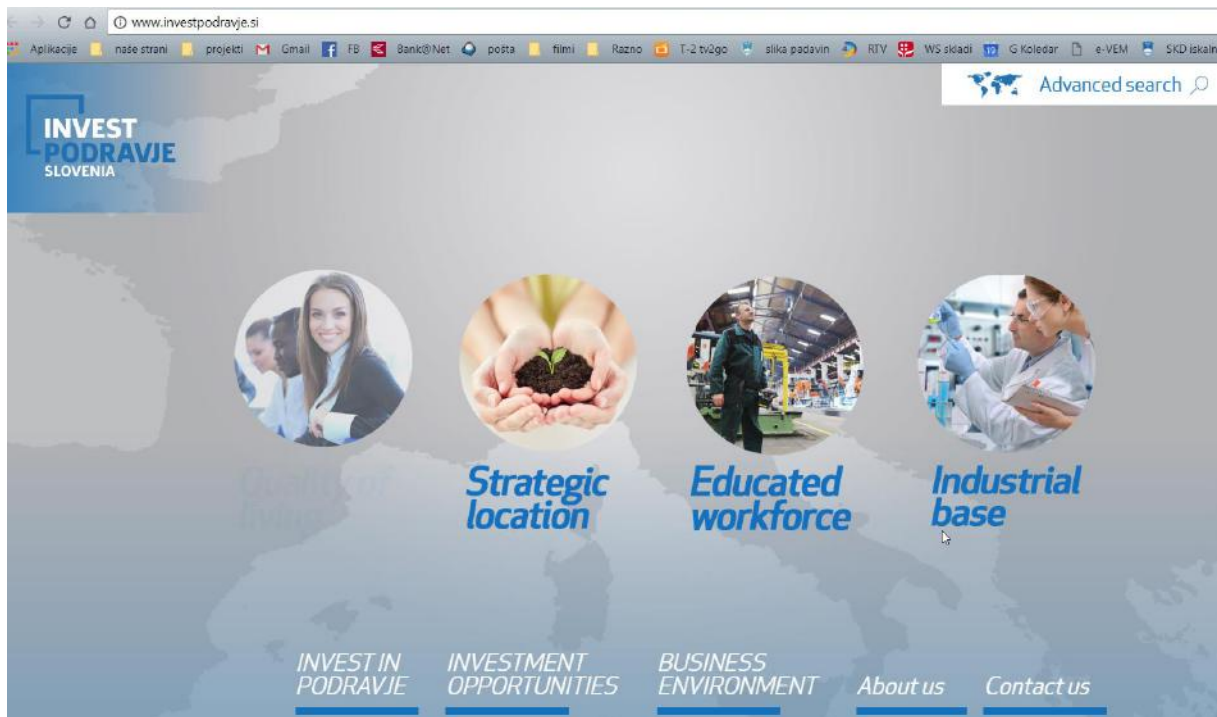

Maribor Development Agency is a public non-profit institution owned by 6 municipalities. It employs 20 experts with different professions and is responsible for the coordination of regional development activities in the Podravska region. Beside the preparation of regional development plan and annual action programs it has experience in development of clusters and networks, creation of regional info systems, internationalization of SMEs, FDI activities, supporting young entrepreneurs / start-ups, tourism development and development of creative industries and development of rural areas. The agency has also prepared a RIS3 strategic documents for Podravska region. It is a member of the Enterprise Europe Network. The know-how and experience gained is exchanged through a fruitful co-operation with the Chambers of Commerce, Chamber of Craft, University of Maribor, technology parks / centres and other economic subjects.

www.mra.si

The screenshot shows the website of the Maribor Development Agency (MRA). The header includes the agency's logo and navigation links: NOVICE, PODRAVJE, POSLOVNO SREDIŠČE, PODJETJA, REFERENCE, O NAS, KONTAKT, ABOUT US. A search bar is located in the top right corner. The main content area features a large banner image of a town by a river. Below the banner, there is a news article titled "Vabilo razstavljalcem in obiskovalcem k udeležbi na sejmu HOLZMESSE 2018 v Celovcu" dated 10/5/2018. The article text mentions that the agency is inviting exhibitors and visitors to the HOLZMESSE 2018 trade fair in Celovec, which took place from August 29 to September 1, 2018. To the right of the article, there are social media sharing buttons for Facebook (3 likes) and Twitter. Below the article, there is another news item titled "Objavljen je Deseti javni poziv za vključitev v program PVSP za problemsko območje" dated 23/4/2018. To the right of this article, there are logos for "INVEST PODRAVJE SLOVENIA" and "enterprise europe network". At the bottom of the page, there is a link to "Erasmus za mlade podjetnike".

## INVEST

### Pomurje Region – Springboard for Foreign Direct Investment

Pomurje Region lies in the north-east of Slovenia, in the heart of Central Europe, neighbouring Austria to the north, Hungary to the east and Croatia to the south. Located along the fifth European transport corridor, Pomurje Region is intersected by one of the EU's most strategic routes. The vicinity of neighbouring capital cities and a favourable geostrategic position make the region an important centre for transport and logistics activities. It is, quite simply, one of the most marketable and attractive regions in this part of Europe.

Pomurje is the flattest region of Slovenia, stretching for 1.337 km<sup>2</sup> along the River Mura. It has extensive arable land, fertile soil, wine-growing hills, natural surroundings and a continental climate, all of which create favourable conditions for agriculture and the

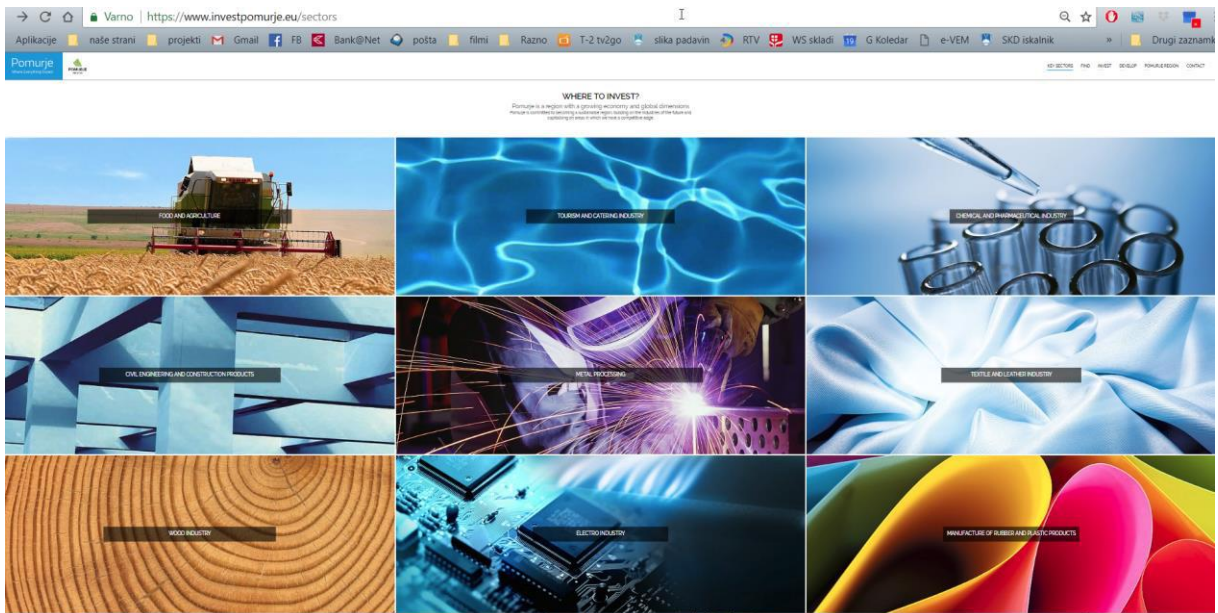

### Investment opportunities

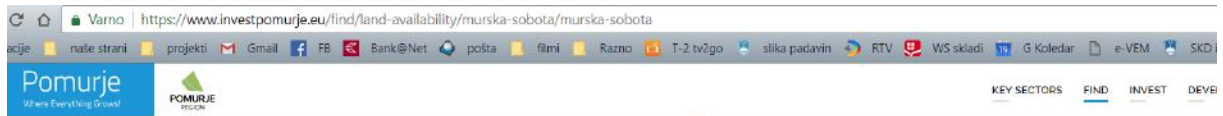

#### European regulatory framework

Our commitment to strengthening the region's economy has created a chain of industrial zones that boast modern infrastructure effective at facilitating all kinds of investment. Pomurje Region can offer more than 3.680.000 m<sup>2</sup> of building plots available for construction in existing or new industrial and business zones.

With competitive land prices and full administrative support, we can find a suitable solution for all your business needs that meet the requirements specific to your industry.

A company operating in Pomurje Region follows the rules and standards of the EU. The construction process is carried out in line with the European Union directive on

## SPOT svetovanje Pomurje

PROJEKT SPOT SVETOVANJE POMURJE

Projekt se izvaja v okviru »Operativnega programa za izvajanje Evropske kohezijske politike v obdobju 2014 – 2020«, prednostne osi: »3. Dinamično in konkurenčno podjetništvo za zeleno gospodarsko rast«; prednostne naložbe: »3.1 Spodbujanje podjetništva, zlasti z enostavnejšim izkoriščanjem novih idej v gospodarstvu in pospeševanjem ustanavljanja novih podjetij, tudi prek podjetniških inkubatorjev«; specifičnega cilja: »3.1.1. Spodbujanje nastajanja in delovanja podjetij, predvsem start-up podjetij«.

Namen javnega razpisa je podpora in pomoč potencialnim podjetnikom ter mikro, malim in srednje velikim podjetjem (v nadaljevanju MSP) v skladu z Zakonom o podpornem okolju za podjetništvo (Uradni list RS, št. 102/07, 57/12, 82/13, 17/15 in 27/17-v nadaljevanju ZPOP-1), ki se srečujejo s podjetniškimi izzivi na celotnem območju Republike Slovenije, ter izboljšanje podjetniške kulture. Javni razpis je namenjen krepitvi podjetniškega potenciala za MSP in pospeševanje ustanavljanja novih MSP.

#### 4.1.10 Start-up programmes

The Initiative Start-up Slovenia is an active facilitator and promoter of public and private stakeholders of the Slovenian start-up ecosystem. In collaboration with them, we also carry out and promote national programmes for supporting innovative entrepreneurship. With all listed activities and partners, we are trying to place Slovenia on the map of established European start-up hubs. The leading partners of the Initiative are the strategically connected Venture Factory and Technology Park Ljubljana. Members of the Initiative are Primorska Technology Park, Pomurje Technology Park, Savinja Region Incubator, SAŠA Incubator and RC IKT.

The screenshot shows the website for Initiative Start-up Slovenia. The browser address bar displays 'https://www.startup.si/en-us'. The website header features the logo and the tagline 'Together we are developing a vibrant startup ecosystem'. Navigation links include Highlights, Programmes, Award, PODIM, Community, Funding, and About us. A main banner promotes community benefits with hashtags: #consulting, #supporting, #collaborating, #sharingexperiences, and #openingdoors. A large group photo of people celebrating is shown, with a red button labeled 'About the initiative'. To the right, a blue sidebar encourages newsletter sign-ups with the text 'Don't miss the news on our startup scene!' and fields for 'Name and surname' and 'E-mail address', followed by a red 'Sign in' button. Below the main content, there are sections for 'News' and 'Events'. The 'News' section lists an article from May 12th about business opportunities in space. The 'Events' section lists two events: 'PODIM Conference 2018' on May 15th and 'WeAreDevelopers 2018' on May 16th.

#### 4.1.11 Social entrepreneurship

The SOCIAL ECONOMY OF SLOVENIA (ZSES) is an independent, non-governmental, non-political institution based on the principles of social entrepreneurship. It represents its members who actively work in the field of social economy, regardless of their organizational form. The members of ZSES are NGOs, social enterprises, emerging social enterprises, institutions of supportive environment, humanitarian organizations and individuals who want to contribute to the development of social entrepreneurship.

### Aktualno

Figure 49: socialnaekonomija.si.

Tkalka/Weaver as alternative office building in the very heart of Maribor has reopened its gates in 2014 to a picturesque collage of organisations, initiatives and individuals who inhabit its premises in diverse processes of cooperation and in multifarious aspects of co-working. Fundamentally diverse activities of over 120 individuals and of more than 55 organisations inhabiting Tkalka/Weaver thus intertwine, connect and intersect in the organic atmosphere of a working and living habitat. Tkalka/Weaver thus stands for both the edifice it designates and the process it embodies: it is co-working in ceaseless formation; it is a delicate fabric of professional, conceptual and existential variety; it is supportive environment for socially engaged work and life.

#### 4.1.12 The Cooperation Programme Slovenia-Hungary

The Cooperation Programme Interreg V-A Slovenia-Hungary is the continuation of a cooperation process which started in the middle of the 90s under trilateral and bilateral compositions (Austria-Slovenia-Hungary, Slovenia-Hungary-Croatia, and Slovenia-Hungary Cross-Border Cooperation Programmes). This long tradition in CBC programmes resulted in an accumulation of valuable experiences regarding the EU territorial cooperation between the management bodies but also among relevant stakeholders from the two countries, which is taken into consideration by the current programme.

In developing the strategy, the Task Force – the joint body responsible for the elaboration of the Cooperation Programme – considered the policy framework provided by the European, national and regional development strategies, the characteristics of the programme area, the experiences of the previous programme periods and the opinion of the stakeholders collected through dedicated events and activities.

Taking into consideration, that from CBC perspective both the development needs and potentials to be addressed are quite similar on the two sides of the border, while acknowledging that there are development needs in many sectors, the Task Force strategic decision was to concentrate the limited financial resources on critically important areas, which may catalyse further positive changes.

Datum zadnje posodobitve: 6. april 2018.

#### AKRONIM PROJEKTA: E-CONOMY (169.954,49 EUR ESRR)

**Vodilni Partner:** Zala Megyei Kereskedelmi és Iparkamara

**Projektni partnerji:** Pomurska gospodarska zbornica, Znanstveno-raziskovalno središče Bistra Ptuj, Pannon Novum Nyugat-dunántúli Regionális Innovációs Nonprofit Kft.

**Povzetek projekta:** Raven sodelovanja med zbornicami, ter institucijami in organizacijami, ki delujejo na področju regionalnega gospodarskega in teritorialnega razvoja v slovensko-madžarskem obmejnem območju ni zadovoljiva. Posledica tega je minimalno sodelovanje na področju komercialnih dejavnosti ter na področju industrijskih in kmetijskih dejavnosti delujočih gospodarskih udeležencev. V gospodarstvu obeh držav bi bilo potrebno izkoristiti priložnosti za širitev obstoječih odnosov, zlasti med MSP. Glede naših izkušenj si priložnosti za sodelovanje obe državi iščeta v drugih smereh. Vendar je veliko podobnosti v gospodarstvu obeh držav, udeleženci se običajno soočajo z enakimi ovirami, težavami. Odprava le-teh je naloga institucij in ga je možno doseči le z višjo stopnjo institucionalnega sodelovanja na obmejnem območju.

Naš cilj je povezati izkušnje, znanja in obstoječe dobre prakse teh organizacij ter jih integrirati v usklajen sistem, ki je podprt s strokovno mentorskim programom. Tako povečamo gospodarsko sodelovanje in izkoriščanje prednosti sosedskih odnosov. Realizacija bo prinesla prebojne rezultate, ki bodo našo regijo kmalu spremenile v evropsko središče gospodarskega preporoda.

V okviru projekta bomo obnovili, razširili obstoječi sistem institucionalnega odnosa, ki trenutno deluje v obmejni regiji na področju regionalnega gospodarskega razvoja, ocenili njegove zmogljivosti ter skušali bomo opredeliti potrebe gospodarskih udeležencev v regiji. Ker so oni gradniki gospodarskega razvoja, za izpolnitev teh funkcij potrebujejo informacije ter podporo iz ozadja, ki ga v obmejni regiji z vzpostavitvijo skupne inovativne, madžarsko-slovenske regionalno informacijske in teritorialno razvojne platforme nudimo, ter za katero zagotovimo tudi potrebno usposabljanje. Trajnost sodelovanja bomo zagotovili z vzpostavitvijo mreže info točk in centrov znanja.

Figure 53: The approved projects SI-HU.

## 4.2 Conclusions of the Slovenian workshop

The first conclusion is that the web pages are in Slovene and most of them also in English. Only some exceptions are available in Hungarian language.

The second conclusion is that the business support system is well developed in Slovenia and many state institutions such as SPIRIT Slovenija, AJPES, FURS offer good information for entrepreneurs looking for opportunities to invest or business partners. The business entity search engine on AJPES webpage enables search among Slovenian businesses by several criteria including their business success.

The service under the name of SPOT must be specially noted because it offers the registration of companies free of charge, and business counselling provided is free of charge. The service can be used by foreigners also.

Chambers of Commerce and Craft offer some additional information and can be used as connecting point for entrepreneurs although most of their services are charged.

University of Maribor is also active in knowledge and technology transfer toward businesses.

The most innovative elements of business support ecosystem are development agencies, which are involved in several European projects resulting in applications interesting for entrepreneurs; Start-up ecosystem empowering the start-up companies and lately developed ecosystem of social economy.

## 5 Workshop of business support organisations in Hungary

The workshop was carried out on the May 2<sup>nd</sup>, 2018, in Szombathely.

The participants were:

- Zoltán Farsang, Strategy Director, Pannon Novum West-Transdanubian Regional Innovation Nonprofit Ltd.
- Zoltán Kalcsú, Project Manager, Pannon Novum West-Transdanubian Regional Innovation Nonprofit Ltd.
- Renáta Verger, Project Manager, Zala County Chamber of Commerce and Industry,
- Tamás Molnár, Financial Manager, Vas County Chamber of Commerce and Industry,
- Péter Szighety, Project Manager, Vas County Chamber of Commerce and Industry,
- Tamás Horváth, Vas County Chamber of Agriculture,
- Ádám Végh, Vas County Chamber of Agriculture,
- Csaba Babós, Foundation for Regional Enterprise Promotion in Vas County and the City of Szombathely,

- Krisztina Eredicsné Ávár, Financial Executive, Pannon Novum West-Transdanubian Regional Innovation Nonprofit Ltd.

Figure 54: The Hungarian workshop in Szombathely.

## 5.1 Conclusions of the Hungarian workshop

Within the framework of the E-CONOMY project, a mobile application and online regional information and development platform will be set up in cooperation with the professional institutions and partners. The aim of this platform is to create an information base for the Hungarian and Slovenian economy and to help establish business relationships between the Hungarian and Slovenian enterprises registered on the platform. There were carried out personal interviews with entrepreneurs and institutions to reveal what they expect from an integrated, effectively functioning system.

We have suggested three main topics to be developed by IT support in the following areas, organisational cooperation opportunities and obstacles, enterprises opportunities and obstacles, IT development ideas. It was proposed not to separate the administration interfaces; a single interface should be used for both the website and the mobile application administration. It was also proposed to classify the members, as possible ordinary members, sponsors and strategic partners. Admin authorization is required to make data uploaded by external users available on the site.

The proposal concerned the provision of NACE code ('TEÁOR' numbers, statistical classification of economic activities in Hungary), for the main activities. It is important to keep the content up to date because this is the way to retain members. Categorization can also play an important role (satisfied /unsatisfied customers), since it is a strong feedback. Good clients are those who are active. We can provide services to them. an application, then it will monitor the offers and give a signal to sign in the E-economy site. If the portal is updated, the user will get immediate feedback. We need to consider how many searches results the system should present - few (3-5) but relevant results. It is important to give the chance of inactivity.

## 6 Joint coordination workshop

With the help of a collection of institutional data and personal interviews, we evaluated the existing capacities (existing databases, web interfaces, technical, personality characteristics, etc.) and analysed them in expert workshops. The result of these implemented activities will be the methodological manual for graphic, content and structural elements and the functioning of the web and mobile application platform that will be developed in this project.

In cooperation with partners, institutions and entrepreneurs, workshops have already been carried out in Slovenia on the 29<sup>th</sup> March, 2018 and in Hungary on the 2<sup>nd</sup> May, 2018. Based on the experience gained at these two specific expert workshops, a two-day joint coordination workshop in Hungary on the 24<sup>th</sup> and 25<sup>th</sup> May, 2018 was held.

The participants of the workshops were:

- Verger Renáta, ZMKIK
- Nataša Lorber, PGZ
- Rahela Kodila, PGZ
- Kalcsú Zoltán, Pannon Novum Nonprofit Kft.
- Vatics László, Pannon Novum Nonprofit Kft.
- Bodó Adrienn, Pannon Novum Nonprofit Kft.
- Lidija Tušek, Bistra Ptuj
- Jadranka Krajnc, Bistra Ptuj
- Danica Košir, Bistra Ptuj
- Rosvita Bedrač, Bistra Ptuj
- Sandra Kozar, SUN d.o.o
- Magda Berden, tolmačs / prevajalka
- Joós Attila, Webmark Kft.
- Boris Jesih, főkonzul / generalni konzul
- Dr. Szili-Fodor Dóra, NAK Zala Megyei Igazgatóság
- Budainé Illyés Dóra, Kontakt Nonprofit Kft.
- Horváth Tamás, Pannon Térségfejlesztő
- Kovács István, Pannon Vidékért Kft.
- Léhártné Csiszár Erika, Léhárt Gábor ev. / samostojni podjetnik
- Léhárt Lajos, Léhárt Lajos ev. / samostojni podjetnik
- Szakács Jenő, Szakács Chemical-Metal Kft.
- Szakács Krisztián, Szakács Chemical-Metal Kft.
- Nagy Zsuzsanna, KISOSZ
- Dr. Császár Zoltán, Caesar Consulting Tanácsadó Kft.

## 6.1 The first draft of graphic design

Attila Joós, director of Webmark Kft presented the draft of graphic design of the web platform (Figure 55), which was approved by partners.

The screenshot displays the e-CONOMY web application interface. At the top, there is a navigation bar with the e-CONOMY logo and menu items: NYITOLAP, HÍRŰZET, PARTNEREK, SZERZŐMUNKÁK, TUDÁS, A PROJEKTOK, KAPCSOLAT. Below the navigation bar, there is a search bar with the text "szűrt találatok" and a "SZŰRÉS" button. The main content area shows a list of search results for "Interimny Vagy Gondozási Társulás". Each result includes a profile picture, the company name, location, and a "Küldés" button. On the right side, there are three filter panels: "ORSZÁG" (Country) with options for "Slovenia" and "Magyarország"; "SZERZŐTÍPUS" (Contract type) with options for "Interimny", "Magasvezető", "Bérszámvetés", and "Iskolai"; and "TEVÉKENYSÉGI SÉR" (Activity sector) with a long list of industry categories. Below these filters are two more panels: "AJÁNLAT JELLEGE" (Offer type) and "SÖVÉNYMŰKÖDÉS JELLEGE" (Cooperation type). At the bottom, there is a pagination bar showing page numbers from 1 to 13.

## AZ e-CONOMY PROJEKTRŐL

Projektok általános célkitűzése a programterületen a területfejlesztésben, megvalósuló fejlesztések kiváltás és a területi tevékenységek szervezésének együttműködésével a magyar-szlovén határterület gazdasági fejlődésének előmozdítása, a gazdasági kohézió erősítése. Ezen intézkedések együttműködésének ösztönzésével a projektnek köszönhetően jelentősen fejlődnek a határon átnyúló kapcsolatok a gazdasági élet számos területén. Projektok általános céljaink elérése érdekében szükséges a meglévő intézményi kapcsolatokkal kijáratni, a helyi közélettel összefüggésben, elsősorban a szomszédokhoz – többek között a nyelvi és területi közelegek fejlesztése által –, kapcsolódni a közösségi együttműködésben végző előzőket.

Főfontosnak tartjuk az érdekeltek partnerségi, releváns intézmények bevonását a projekt valamennyi tevékenységébe, hiszen ez biztosítja, hogy a projekt átjáró, áthidaló jellegű a területi igények, elvárásainak megfelelően tudják megvalósítani. A projektterület kiemelt célunk a helyi és járási szintű releváns szereplők és hatóságok is. A projekt kiemelt célunk az együttműködés magas szintűre helyezni a területi szinten is, hiszen információs programfejlesztéssel, szakmai és nyelvi kompetenciáfejlesztéssel, valamint tematikus programokkal (konferenciák, workshop-ok, networking rendezvények) hozzájárul az együttműködési kapcsolatok növeléséhez a határon átnyúló kapcsolatok új irányba teretbe való emelés érdekében.

Az e-CONOMY projekt nyitványszerűsége jelentős szerepet játszott a régió aktivizálásában, melynek során a meglévő tevékenységeket a projektterületen is bevonattuk a projektterületi célkitűzések megvalósításába. E célja érdekében az Interreg V-A Szlovénia-Magyarország Együttműködési Program Technikai Tésztárgyaló Végrehajtási csoportjában részt vett a projekt. Borbély Sándor, a Közlekedési Vállalkozásfejlesztési Alapkezelő projektmenedzserje a határon átnyúló együttműködés, közzétett lista a fűző projekt kapcsolatokat közzéteszt címmel tartott előadást, végül az HOF Területfejlesztési Pénzügyi Tanács Társasági Ügykezelője Chmelik Tamás a határon átnyúló fejlesztés célját és területeit ismertette meg.

### A projekt adatai

Projekt rövid címe: e-CONOMY  
 Projekt címe: Intézményi összefogás a határterület gazdasági fejlődésért  
 webes határterületgazdálkodás fejlesztése mellett  
 Projekt időtartama: 2018.01.01-2019.06.30 (18 hónap)  
 Projekt partnerei:  
 - Zala Megyei Kereskedelmi és Szakmai Kamara (vezető partner)  
 - Muravidéki Regionális Gazdasági Kamara  
 - Tudományi Központok Bistra (Pá)

### Főbb tevékenységek

- T.1.1 Intézményi kapcsolatteremtés megújítása
- T.1.1.1. Kapcsolati adatbázis feltöltése
- T.1.1.2. Kapcsolatfejlesztő szimulátor
- T.1.2 Szakmai workshop szervezése
- T.1.2.1 Workshop Magyarország
- T.1.2.2 Workshop Szlovénia
- T.1.2.3. Közös harmonizációs workshop
- T.1.2.4. Igényfeltérési szimulációs műhelyekkel
- T.1.4. Hozzájárulás ösztönzői készítése
- T.2.1 Webes és mobilalkalmazás platform kialakítása
- T.2.2. Rendelkezésre állás
- T.3.1. Szakmai és nyelvi felkészítések intézményeknél

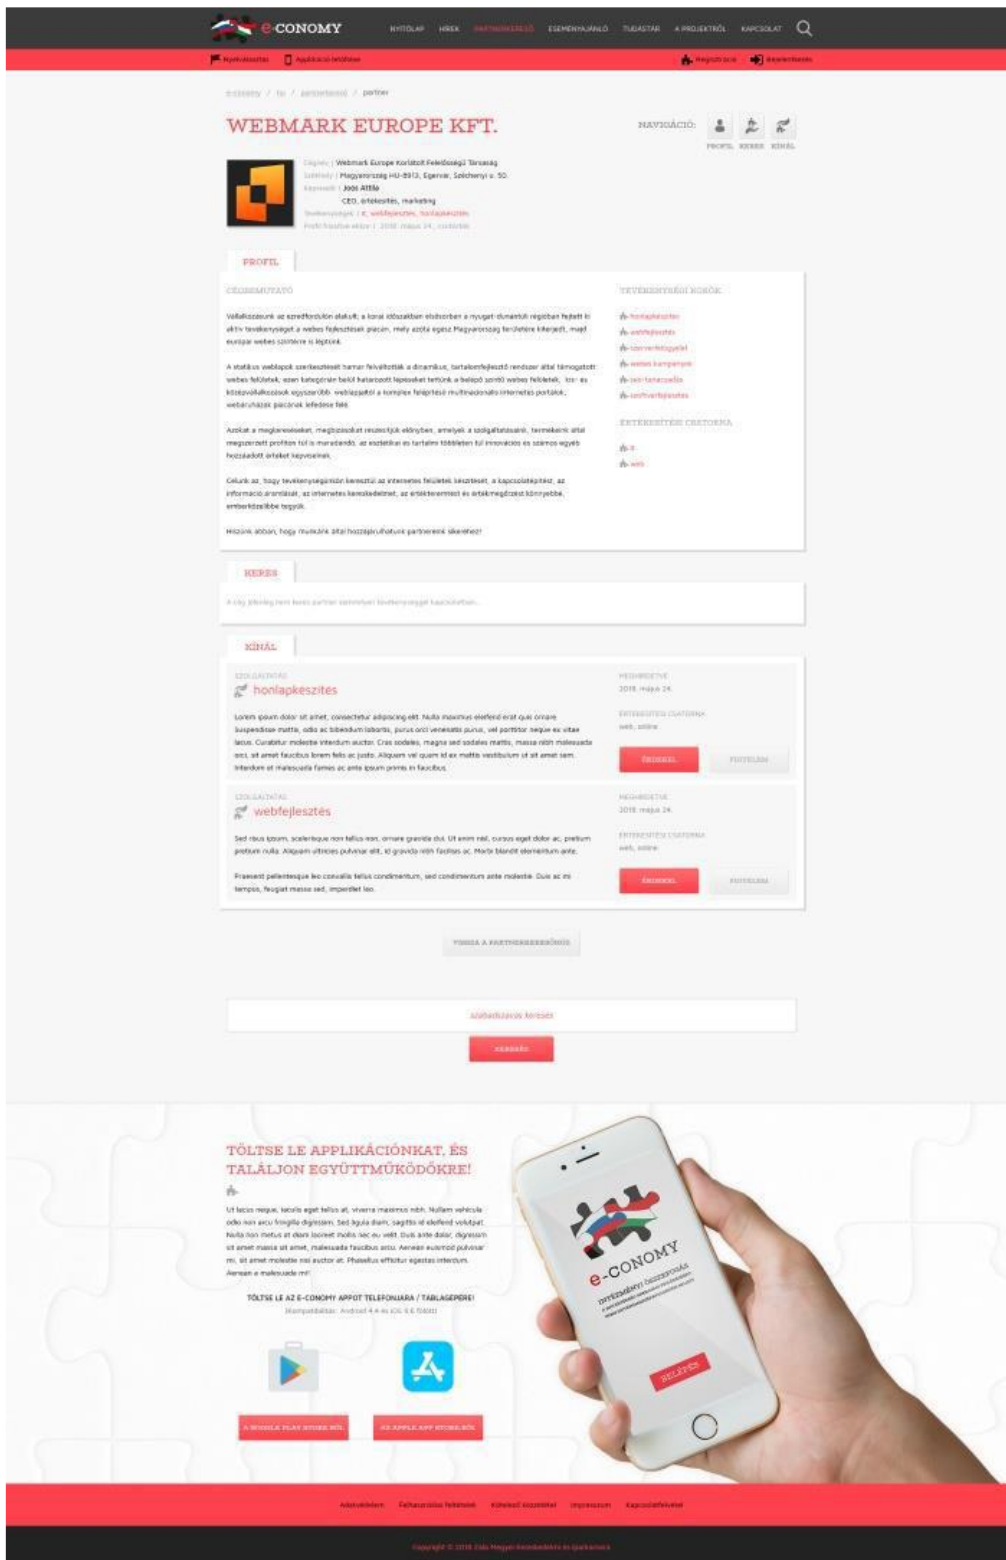

Figure 55: The first draft of the E-CONOMY web platform.

## 6.2 The structure and functions of the platform

The representative of the company presented the structure and functions of the planned platform, the most important points of which are:

- After the design, the website will be available in Hungarian and Slovene, but in the future, it is also possible to expand to other languages
- Three main priorities were identified:
  - user experience;
  - a simple database;
  - maintaining a continuity of information system.
- The model platform was created according to the model of the website of the Netherlands - Hungarian Chamber of Commerce, which is managed by the Hungarian Embassy, and the platform was developed by Webmark Kft.
- The pictograms are typical of the platform, and they have clear and user-friendly elements of great importance.
- The entry page is divided into two parts: the partner search interface and the information interface (knowledge base). In addition, regularly updated news and important events are available on this main page. If the information in the system is not updated, the automatic news will automatically be saved to the system and will be sorted by the system from previous news. In this way, it is ensured that even uncommon visitors to the platform receive variable and not static information (it is not expected that new information will be added to the website each week, since it is not an online magazine).
- Also, on the main page the search boxes will be sorted, which will simplify the search for partners.
- A mobile application download interface will also be installed on the main page.
- The search engine for finding business partners is partially closed, some data will be visible to users without registration, but more detailed information and company information can only be accessed after registration.
- In the Partner Search module, the display of data and information will be approved by the web site administrator after downloading. This will prevent the publication of unwanted data.
- In the search engine companies, only partial company data will be available for unregistered visitors (data available in other public database companies).
- The filtering feature can reduce the number of 50 hits per page.
- The website administrator in the company search engine measures feedback on partners to obtain a benchmark on business partnerships and on the activities of registered companies.
- In development, they will also focus on ensuring the protection of personal data:
  - password-protected closed areas will be created, where personal data including personal information about the company are displayed;
  - every 2-3 weeks a registered company will get a notice to inspect their profile  
In this notice, the system also informs the user of:
    - Who was interested;
    - What new information was published on the website;
    - Anonymous (for motivational purposes) what kind of business cooperation has been developed between registered users of the platform.

- The platform can be accessed at 3 different levels of access:
  1. Visitors without registration:
    - can access a public knowledge base, where Hungarian and Slovene important data and documents are available;
    - presentation of the E-CONOMY project;
    - the possibility of contacting the operator of the website.
  2. Registered users:
    - there will be 50 Hungarian and 50 Slovenian companies, initially, later the number is expanded;
    - business support organizations will also be included.
  3. Administrators (maximum access):
    - management organizations that see all processes, can channel interrupted processes, update information, data, send new information to users, etc. - full administrative powers. Administrators' work will be supported by systemic alerts and messages.
- The development takes place according to the principles of the "old school" (proven solutions), the innovative solution will be only 20-30%, since expectations have not changed in the last 10 years, the area must be fast, mobile and secure.
- The biggest challenge is simple search and filtering. Visitors want to get the desired results with 3 clicks as time is valuable for everyone.
- The platform is currently in the initial phase of the data entry; in the case of new content it is possible to change the structure. The web site will be successful if the first 50-50 companies to be involved in testing are well selected.
- We want users to be active.
- Prior to development of the mobile application, the development of the website is a priority, and the admin will be available in two languages (Hungarian and Slovenian).
- We want to transfer really good ideas and solutions of web pages analysed at previous Hungarian and Slovenian workshops to the E-CONOMY project platform.
- The knowledge base is likely to be different between Hungary and Slovenia (for example, due to the specific nature of each country), but it is advisable to determine common content as soon as possible.
- At signing in of a registered partner, a short summary of what has happened since the last session is made to be able to track new information and newly registered potential partners, etc.
- It is advisable to send a notice to registered users every 2-3 weeks.
- By downloading a mobile application, the user agrees to receive messages. This can also be cancelled later, and user no longer receives unwanted messages.
- An important issue will be that the number of companies entering the system continuously exceeds the number of outgoing companies.
- The content, appearance and structure of the online platform and applications can change in time since both interfaces are in the development phase.

### 6.3 Comments, observations of workshop participants

During the two-day workshop, the participants prepared the following suggestions and comments:

- It is important what kind of people will manage the platform (administrators) and take part in the learning processes.
- Special attention should be paid to the process of selecting 50-50 testing companies because they should use the opportunity to build new business relationships.
- For development, it is important that the mobile application offers a lot of freshness, regular updates, which can help users continuously expand the user's circle (stats are less visited).
- It is important that registered companies are constantly "bombarded" with new information to feel that the site is active.
- It is advisable to facilitate registration by downloading data from public company databases (such as AJPES).
- Registered users want to verify the actual activity of the companies with which they will establish a partnership.
- For funding in the future, it is proposed that the financing model is to be defined already. Enterprises that will register later pay a fee. It is also sensible to think about the introduction of a benefit system. Fees can be used for expert services. The E-CONOMY project helps to launch the platform, but we must also be aware that the site must be maintained even after the project has been completed.
- It is important to provide relevant information on the website in the long run.
- Attention must be paid to informing registered users periodically with the information that is really important, and we must avoid the mass of information.
- We need to provide such information that is relevant to all stakeholders or is crucial to the individual partner. Others - general information, however, is sufficient to be accessible on the website.
- The knowledge base should be linked to the partner search module.
- The search should be enabled using a keyword database that helps standardize search to avoid misunderstandings.
- In addition to keywords, it is necessary to allow each company to enter more detailed information about itself in the text field, in any language.
- Registered users need to provide free upgrade and expansion of information on demand and supply to remove irrelevant information from the system - so registered users will be provided with useful data.
- The search for partners should be monitored from the background, in this way they can be helped.
- It is necessary to request feedback from the partners on the performance of business connections.
- It is necessary to enable the evaluation of registered companies (grades from 1 to 5), which should be private, only visible to administrators, to see which of the partners involved in the system are correct and which are not.
- A good practice for the administrative interface should be used, which will not burden the administrators.
- It is necessary to measure general statistics (number of entries, frequency, time spent, interactions, etc.).

- It is necessary to distinguish between the system generated selection of news and the newsletters.
- It is important that successful partnerships are published on the website, as this will be an incentive for other registered companies.
- A slogan "Support for e-very business" was proposed for the website.
- Consideration was also given to employ a text writer to publish high-quality materials on the website, but the project does not include budget for this purpose. The presentations / descriptions of 50-50 testing companies should be of high quality and professional since it is at the same time a kind of marketing communication.
- Compulsory and non-compulsory content should be provided on the business forms.
- The consideration was that the site could also enable instant chat for potential business partners. This can be a premium service in the future which will be payable.
- Chatbot can be used, which is able to learn. Frequently asked questions can be automatically responded to outside of working hours (Facebook chat or other learning platform).

## 7 Conclusions

The aim of the project E-CONOMY is to facilitate the cross-border networking of business support organisations, exchange of data, knowledge and praxis, but also a development of cross border platform. This guide for the programmer of web platform was prepared using the summarized workshop documents, joint workshop paper and completed questionnaires.
